# PREFACE

---

The installation test kit is designed to allow a field analyst to demonstrate and verify the functions, features and capabilities of the Control Data® CYBER 18 CYBER CREDIT SYSTEM (CCS). This verification consists of comparing the reports resulting from a prescribed sequence of on-line activities against the report output contained in the installation test kit.

The installation test kit system has been parameterized completely. This parameterization includes features that are usually customer dependent. The procedures in the test kit demonstrate the following processes:

- System installation
- Daily processing
- Transaction replay
- COLECT functions
- Promise to pay
- Report generation
- Movement of accounts to and from history

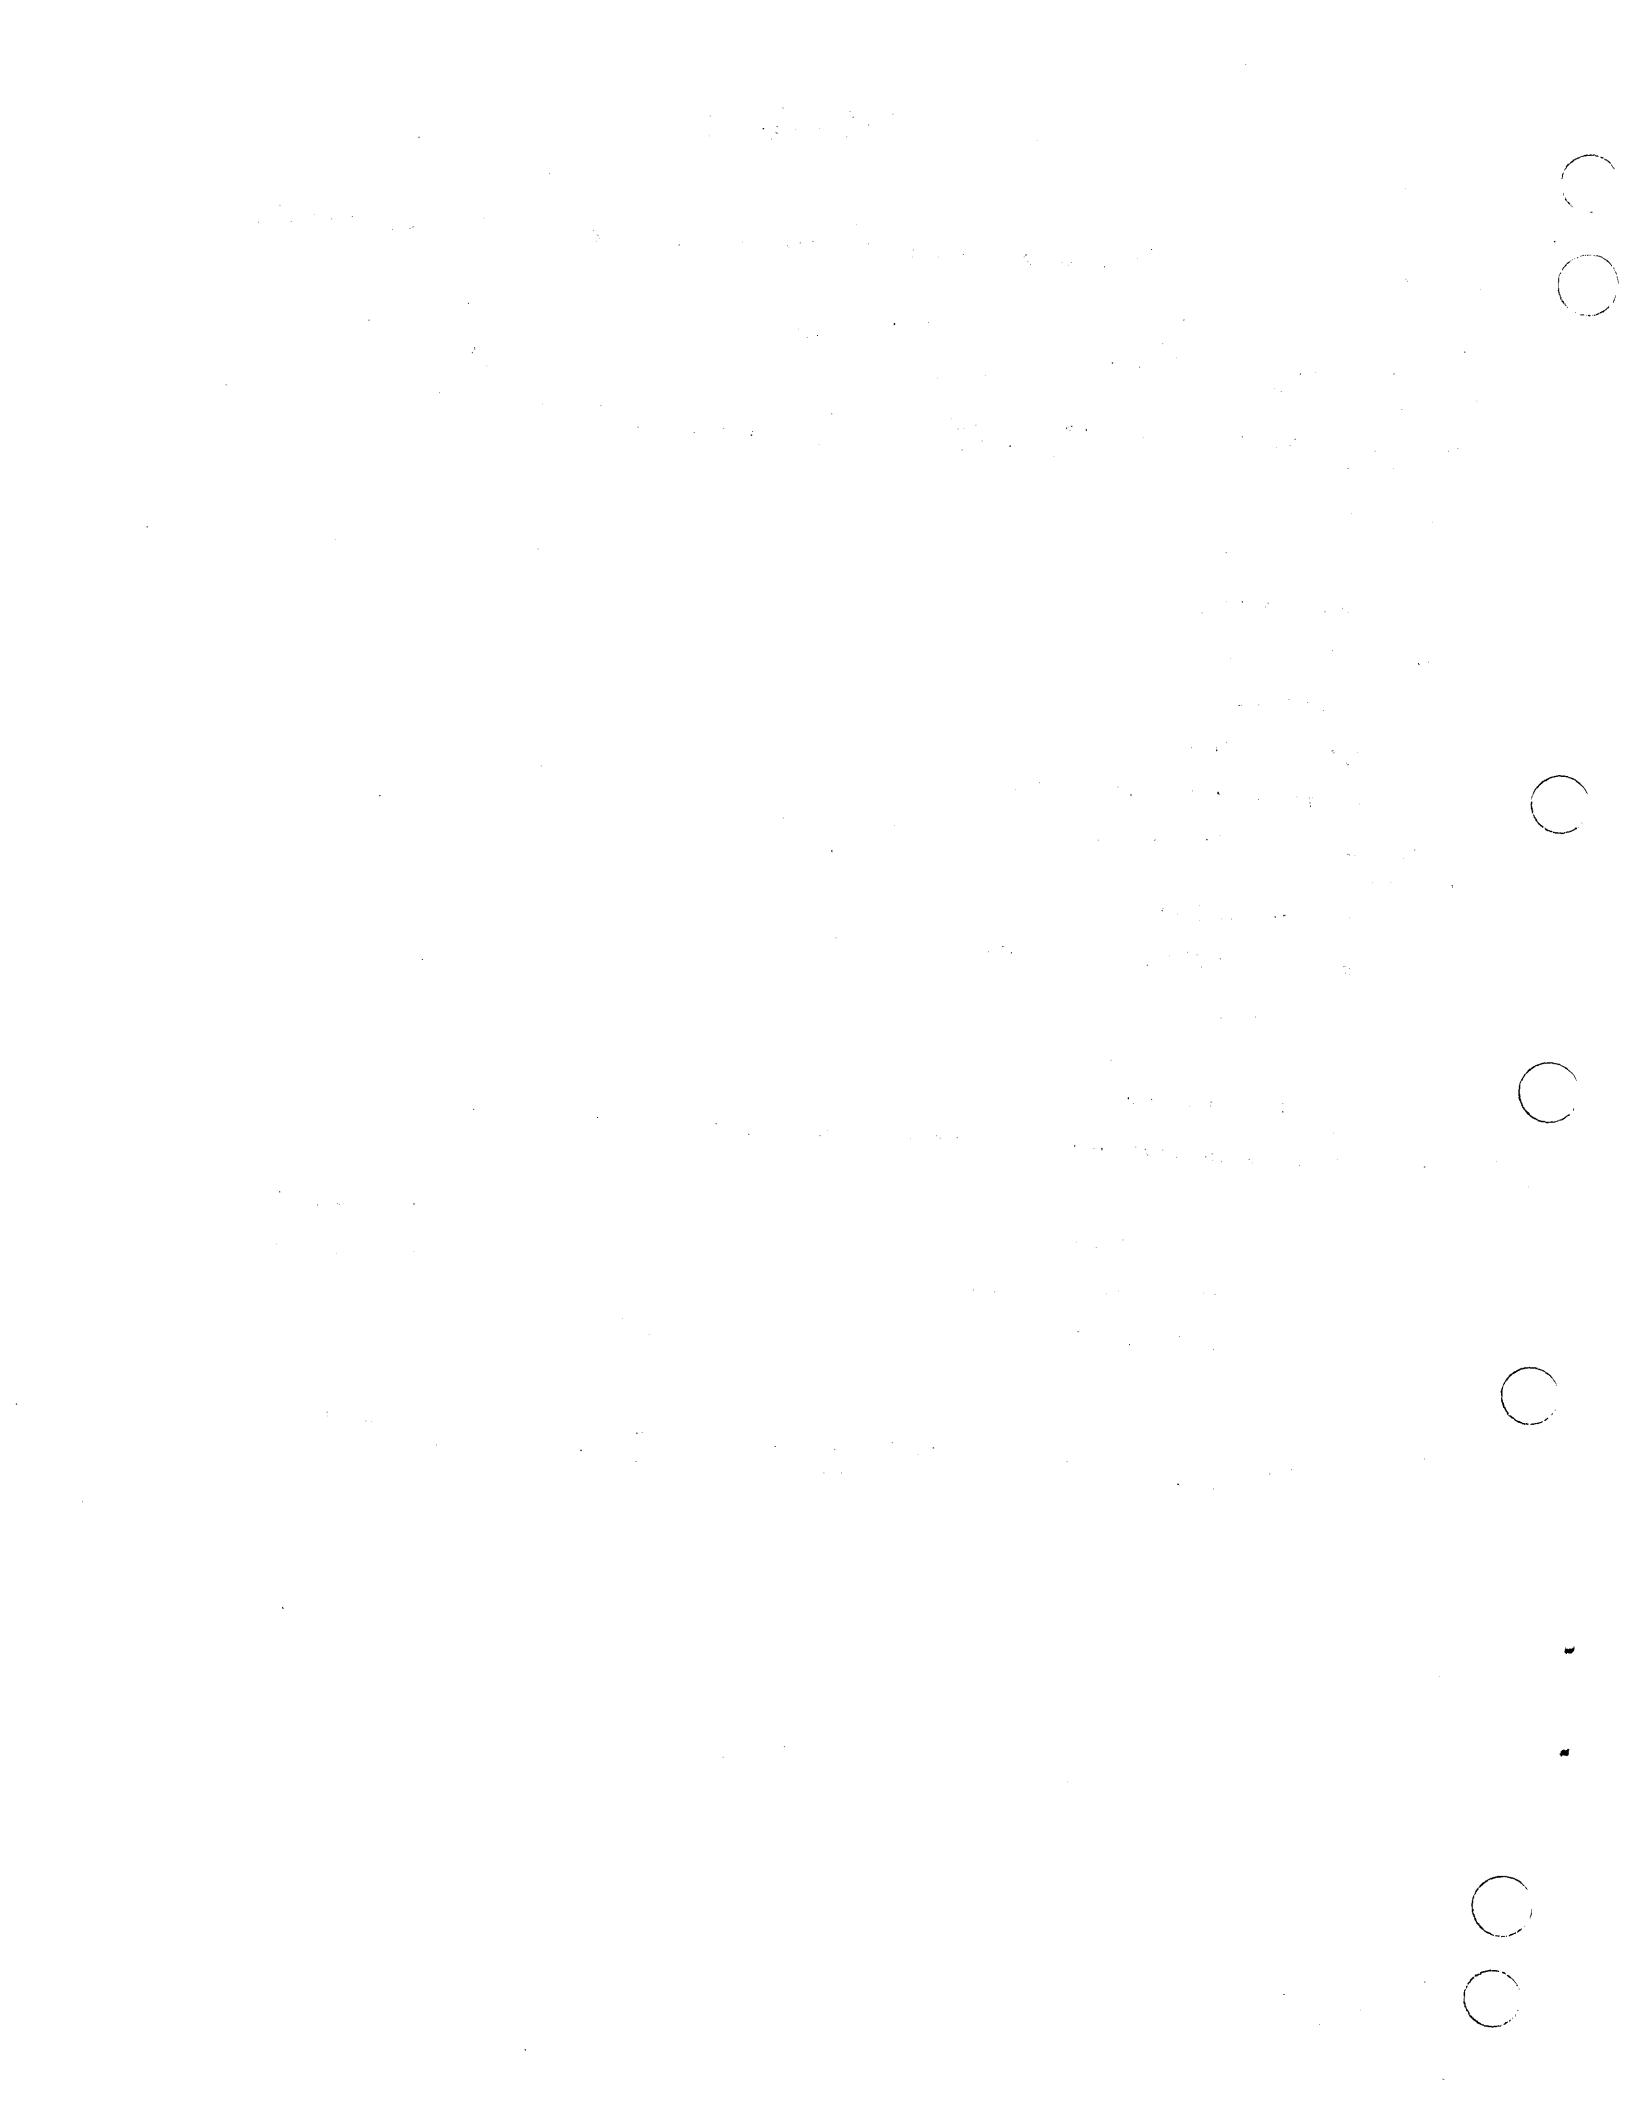

If the system being installed contains the Legal and Agency (LA) subsystem, the following additional functions are also demonstrated:

- LA system installation
- Master file creation (LA delinquent master and client)
- LEGAL functions
- On-line financial entries
- Client file maintenance

The manuals listed below, available from Literature Distribution, contain additional information useful to the CCS user.

| <u>Publication</u>   | <u>Publication Number</u> |
|--|---------------------------|
| CYBER Credit System (CCS) Version 3.0 Reference Manual             | 60475230                  |
| CYBER Credit System (CCS) Version 3.0 Operator's/Collector's Guide | 60475240                  |

CCS 3 is intended for use only as described in this document. Control Data Corporation cannot be responsible for the proper functioning of undescribed features or parameters.

# INSTALLATION TEST KIT REQUIREMENTS

1

## INSTALLATION MATERIALS

The following materials are included in the installation test kit for system installation:

ODS 2.0 level II volume 5 - materials

DTLP deadstart materials

System summary - NNN - DTLP for CCS

System EDTLP install tape

## INSTALLATION PROCEDURE

### INITIALIZE SMD PACKS

Use the following procedure to initialize each disk pack used in the system.

#### NOTE

This procedure takes 30 minutes per disk pack.

1. Mount the disk pack on disk drive unit 0, and ready the unit.
2. Load the ODS 2, level II, volume 5 media for CPU I.
3. Press STOP, MASTER CLEAR, DEADSTART on the control panel.
4. The system responds:

123456 DPSR LEVEL xx RELEASED mm-dd-yy  
ODS 2.0 VOL 5

5. Perform a manual interrupt.
6. The system responds:

MI  
>

7. Enter:  
LOAD,SMD2F (CR)
8. The system responds:  
SMD2F SUSPENDED LOAD
9. Perform a manual interrupt.
10. The system responds:

MI  
>

11. Enter:

(See table 1-1 for correct entry.)

12. Perform a manual interrupt.

13. The system responds:

MI  
>

14. Enter:

DPAR,, (CR)

15. The system responds:

SMD2F RUN PARAMETERS

| TESTID | PASCNT | ERRCNT | 0001 | 0002 | 0003 | 0004 | 0005 |
|--------|--------|--------|------|------|------|------|------|

20. Perform a manual interrupt.

21. The system responds:

MI  
>

22. Enter:

GO (CR)

23. The system responds:

DRIVE AS CONFIGURED 64 SECTORS PER TRACK  
SET MULTI-INDIRECT SWITCH OFF (ESC J40@ MI ODS,GO)  
SMD2F SUSPENDED SELF

24. Enter:

ESC J40@

25. Perform a manual interrupt.

26. The system responds:

MI  
>

27. Enter:

GO

28. The system responds:

SMD2F SECTION 0001  
SMD2F SECTION 0002  
SMD2F SECTION 0004  
SMD2F SECTION 0005  
SMD2F SECTION 0006  
SMD2F SECTION 000A  
BAD SPOT MAPPING COMPLETED  
LAST AVAILABLE SECTOR ADDRESS = 000804BF  
SMD2F COMPLETED 0001 PASSES  
SMD2F SUSPENDED ENDP

#### NOTE

The operator should insure that the last three messages are displayed before continuing. If they are not, the operator should notify the supervisor.

The disk pack is now initialized.

To initialize additional disk packs, mount and ready the disk pack on disk drive unit 0, and perform steps 25 through 28.

#### DTLP TAPE INSTALLATION

Ensure that the disk packs have been initialized, and then perform the following procedure:

1. Mount the DTLP system tape on magnetic tape unit 0, and ready the unit.
2. Load the DTLP deadstart material, and ready the unit.

#### NOTE

Use 25IPS material for the 25IPS system; use 50IPS material for the 50IPS system.

3. Press STOP, MASTER CLEAR, DEADSTART on the control panel.

4. The system responds:

4 DIG. EQ. CODE FOR..  
MAG. TAPE

5. Enter:

0480 (CR) (for 25 inch-per-second system)  
0601 (CR) (for 50 inch-per-second system)

6. The system responds:

4 DIG. EQ. CODE FOR..  
MASS MEMORY

7. Enter:

0700 (CR)

8. The system responds:

SCRATCH SECTOR IN \$C1 IS -- xxxx  
TYPE LOAD FOR TAPE-TO-DISK, SAVE FOR DISK-TO-TAPE  
OR CARRIAGE RETURN

9. Enter:

LOAD (CR)

10. The system responds:

INPUT TAPE ON UNIT 0. READY?

11. Enter:

(CR)

12. Upon completion, the system responds:

xxxx SECTORS LOADED  
TYPE V FOR VERIFY, A FOR AUTOLOAD.  
OR A CARRIAGE RETURN TO RESTART

13. Enter:

V (CR)

14. The system responds:

VERIFY TAPE ON UNIT 0. READY?

15. Enter:

(CR) when the tape is at load point and ready.

16. Upon completion, the system responds:

xxxx SECTORS VERIFIED,  
TAPE V FOR VERIFY, A FOR AUTOLOAD  
OR A CARRIAGE RETURN TO RESTART

17. Autoload the system.

18. Press: STOP, MASTER CLEAR, AUTOLOAD, and RUN on the control panel.

19. The system responds:

CCS 3.0 -- PSR LEVEL nnn mm/dd/yy  
nnnK BYTES OF MEMORY - CPU I  
nnnnK BYTES FO MEMORY - CPU II  
SYSTEM CONFIGURED FOR USE OF 1860-x MAG TAPES  
SET PROGRAM PROTECT (ESC J28@)

20. Enter:

ESC J28@

21. The system responds:

CCS 3.0 (MM/DD/YY)

ENTER DATE/TIME MMDDYYHHMM

22. Enter the date and the time and press (CR).

23. The system responds:

0417791557  
CP STARTED 0000  
DATE: 17 APR 79 TIME: 1557:00

### EDTLP - LOAD SYSTEM FROM TAPE

This procedure loads the CCS system from tape to disk.

Before proceeding, the operator should set the page button, located in the upper right section of the keyboard, in the up position (scroll mode) and ensure that the printer is ready.

#### EDTLP Tape Installation

**NOTE**  
If it is necessary to exit the EDTLP procedure (by responding EX to a system message), the following message will be displayed:

JP ,\*EDTLP  
JOB ABORTED  
>

The operator must autoload the system.

1. Perform a manual interrupt.

2. The system responds:

MI  
>

3. Enter:

\*BATCH, 4 (CR)

4. The system responds:

J  
>

5. Enter:

\*JOB (CR)

6. The system responds:

J  
>

7. Enter:

\*EDTLP (CR)

8. The system responds:

TYPE SAVE (CR) FOR DISK-TO-TAPE SAVE  
TYPE LOAD (CR) FOR TAPE-TO-DISK RELOAD

9. Enter:

LOAD (CR)

10. The system responds:

TAPE TO DISK RELOAD

ALTERNATING TAPE DRIVES FOR MULTI TAPES  
REEL #            LOGICAL UNIT #        TAPE DRIVE #

|   |    |   |
|---|----|---|
| 1 | 6  | 0 |
| 2 | 16 | 1 |
| 3 | 6  | 0 |

YOU MAY CHOOSE TO USE ALTERNATING TAPE DRIVES OR ONLY ONE TAPE DRIVE. IF YOU WISH TO USE ONLY ONE TAPE DRIVE, SPECIFY THE TAPE DRIVE NUMBER OF THE DRIVE YOU WISH TO USE.

ALTERNATING DRIVES (Y OR N)

11. Enter:

N (CR)

12. The system responds:

SELECT A TAPE DRIVE (0 OR 1)

13. Enter:

0 (CR)

14. The system responds:

\*\*\*\*  
\*\*\*\* OPERATOR - MOUNT SAVE TAPE REEL 1 ON-UNIT 0 WITHOUT RING  
\*\*\*\*

TYPE GO TO CONTINUE, EX TO EXIT >

The operator mounts the tape entitled CCS 3 SYSTEM EDLTP on unit 0 and readies the unit.

15. Enter:

GO (CR)

16. The system responds:

TAPE TO DISK RELOAD

\*\*\*\* TAPE WAS MADE MM-DD-YY AT HHMM

THE FOLLOWING VOLUMES WILL BE RELOADED TO DISK

| VOLUME NAME | DISK NUMBER |
|-------------|-------------|
| SYSVOL      | 0           |

IS THIS THE CORRECT SAVE TAPE (Y OR N)

17. Enter:

Y (CR)

18. The system responds:

TURN OFF PROTECT SWITCH (ESC J20@)  
AND TYPE CARRIAGE RETURN

19. Enter:

ESC J20@ (CR)

20. The system responds:

\*\*\*\*  
\*\*\*\* OPERATOR - BE SURE YOU HAVE THE CORRECT DISK PACKS MOUNTED AND DISK DRIVES ARE READY  
\*\*\*\*  
\*\*\*\*

\*\*\*\*  
\*\*\*\* OPERATOR - DO NOT TYPE GO UNTIL DISK DRIVES ARE READY  
\*\*\*\*

TYPE GO TO CONTINUE, EX TO EXIT>

21. Enter:

GO (CR)

22. The system responds:

SYSVOL IS BEING RELOADED TO DISK

#### NOTE

If the system being installed contains 150 mb disk drives, the following message is displayed:

DISK SIZES ON TAPE AND VOLUME ARE DIFFERENT. TYPE GO TO CONTINUE, EX TO EXIT>

Enter:

GO (CR)

23. When complete, the following messages are displayed:

TAPE TO DISK RELOAD COMPLETE

\*\*\*\* OPERATOR - AUTOLOAD THE SYSTEM

#### Autoload

The system is autoloaded by pressing successively on the control panel:

STOP  
MASTER CLEAR  
AUTOLOAD  
RUN

The following messages are displayed:

CCS 3.0 -- PSR LEVEL nnn mm/dd/yy  
nnnK BYTES OF MEMORY - CPU I  
nnnnK BYTES OF MEMORY - CPU II  
SYSTEM CONFIGURED FOR USE OF 1860-x MAG TAPES  
SET PROGRAM PROTECT (ESC J28@)

The operator presses ESC and types:

J28@

The following message is displayed:

(SYSTEM ID)  
ENTER DATE/TIME MMDDYYHHMM

The operator types the correct date and time and presses (CR).

The following message is displayed:

DATE: dd mon yy      TIME: hhmm:ss

## CONFIGURE TYPE AND SECTOR SIZE OF UNIT 1

### NOTE

This function applies only to disk drives 1-3. System volume SYSVOL (unit 0) is not configured via this function. It is automatically configured at initial autoload.

1. Perform a manual interrupt.

2. The system responds:

MI  
>

3. Enter:

SMDC (CR)

4. The system responds:

SMD CONFIG IN  
INPUT FORMAT (TYPE 'EXIT' TO EXIT)  
UNIT NO. (1-3), DRIVE TYPE (20,40), SECTOR SIZE (96,569)

5. Enter:

(See table 1-2 for correct entry.)

6. The system responds:

UNIT 1 CONFIGURED  
INPUT FORMAT (TYPE 'EXIT' TO EXIT)  
UNIT NO. (1-3), DRIVE TYPE (20,40), SECTOR SIZE (96,569)...

## Configure Additional Volumes

At this point, unit 1 has been configured. If additional disk drive units are present on the system, they must be configured by repeating steps 5 and 6 for each disk drive unit. When all disk drive units have been configured, type:

EXIT (CR)

The system responds:

SMD CONFIG OUT

TABLE 1-2. SMDC ENTRY

| Number of Accounts in Delinquent Master File | Enter for Disk Drive Unit 1 | Enter for Disk Drive Unit 2 | Enter for Disk Drive Unit 3 |
|--|-----------------------------|-----------------------------|-----------------------------|
| 12,000 CCS                                   | 1,20,96                     | N/A                         | N/A                         |
| 24,000 CCS                                   | 1,20,96                     | 2,20,96                     | N/A                         |
| 36,000 CCS                                   | 1,20,569                    | 2,20,569                    | N/A                         |
| 78,000 CCS                                   | 1,40,96                     | N/A                         | N/A                         |
| 12,000 CCS/9,000 LA                          | 1,20,96                     | 2,20,96                     | N/A                         |
| 24,000 CCS/9,000 LA                          | 1,20,96                     | 2,20,96                     | 3,20,96                     |
| 36,000 CCS/13,5000 LA                        | 1,20,569                    | 2,20,569                    | 3,20,569                    |
| 60,000 CCS/18,000 LA                         | 1,40,96                     | N/A                         | N/A                         |

## MODIFY FOR LOWER CASE PRINT

The CCS system is configured to support the UPPER CASE PRINT BAND. If the printer installed on the system has the LOWER CASE PRINT BAND, this procedure must be executed to utilize this band.

1. Perform a manual interrupt.
2. The system responds:

MI  
>

3. Enter:

LPCF (CR)

4. The system responds:

LPCF IN  
LOWER CASE CURRENTLY DISABLED  
ENTER 'E' ENABLE LOWER CASE:  
ENTER 'D' TO DISABLE LOWER CASE...

5. Enter:

E or D (CR)

6. The system responds:

LPCF OUT

## SYSTEM IDENTIFICATION DEFINITION (SYSTEM ID)

This procedure allows the user to change the 32 character system ID that appears as part of the autoload message (first line after setting the protect switch) and log-on message (third line). This may be executed at any time the user wishes to change the system ID.

1. Perform a manual interrupt.
2. The system responds:

MI  
>

3. Enter:

SYID (CR)

4. The system responds:

SYID IN  
ENTER 32 CHARACTERS OF TEXT

5. Enter:

(Enter the data the customer has defined as the system ID (CR).)

6. The system responds:

SYID OUT

## START CCS

1. Perform a manual interrupt.
2. The system responds:

MI  
>

3. Enter:

START (CR)

4. The system responds:

BUILDING SYSTEM FILES  
CCS ACTIVE AT HHMM

### INITIALIZE NON-SYSTEM VOLUMES

At this point, log on the master terminal (system console), and initialize packs on the nonsystem disk drives. The initialization process writes volume names on the packs. CCS uses the volume names of CDD01, CDD02, and CDD03 on nonsystem drives 1, 2, and 3. For instance, to log on and initialize a pack for drive 1, the procedure is, where (CR) denotes carriage return:

```
+ (CR)  
USER ID = (CR)  
REQUEST = UT (CR)  
READY>INIT (CR)  
VL = CDD01 (CR)  
    (see table 1-3 for correct entry)  
NF = (CR)  
DK = 1 (CR)      (DRIVE 1)  
VOLUME = (CR)
```

At this point, the nonsystem packs should be logically mounted. This is accomplished per drive as appears below:

```
READY>MOUNT (CR)  
VL = CDD01 (CR)  
DK = 1 (CR)  
READY > EX (CR)  
END UTIL  
  
REQUEST = EX
```

The following message is displayed at the master console.

CCS LOG OFF HH:MM:SS

### ACTIVATE BATCH HOST

The batch host must be activated for the report generator to be run without interruption during the on-line activity.

Perform a manual interrupt.

TABLE 1-3. NUMBER OF FILES ENTRY

| Number of Accounts in Delinquent Master File | Number of files on CDD01 | Number of files on CDD02 | Number of files on CDD03 |
|--|--------------------------|--------------------------|--------------------------|
| 12,000 CCS                                   | 256                      | N/A                      | N/A                      |
| 24,000 CCS                                   | 256                      | 256                      | N/A                      |
| 36,000 CCS                                   | 256                      | 256                      | N/A                      |
| 78,000 CCS                                   | 100                      | N/A                      | N/A                      |

The system responds:

MI  
>

Enter:

\*BATCH, F (CR)

## SYSTEM CONFIGURATION

The following procedures will build the menus, procedures and data files necessary for the installation selected by the customer. To execute these procedures, it is necessary to log onto CCS.

Enter:

+ (CR)  
USERID = \$\$ (CR)  
REQUEST =>

### Execute SC Procedure (Build System)

The operator types:

SC

and presses (CR).

The system configuration menu is displayed as follows:

#### SYSTEM CONFIGURATION MENU

BEFORE MAKING A SELECTION FROM THIS MENU, BE SURE THE AUXILIARY DISK PACK(S) HAVE BEEN INITIALIZED WITH THE CORRECT VOLUME LABEL OR LABELS FOR THE SYSTEM WHICH YOU WILL SELECT. ALL DISK PACKS SHOULD BE MOUNTED AND READY.

- A - 12000 ACCOUNT CCS SYSTEM (VOLUME CDD01)
- B - 24000 ACCOUNT CCS SYSTEM (VOLUME CDD01/CDD02)
- C - 36000 ACCOUNT CCS SYSTEM (VOLUME CDD01/CDD02)
- D - 78000 ACCOUNT CCS SYSTEM (VOLUME CDD01)
- E - 12000/9000 ACCOUNT CCS/LA SYSTEM (VOLUME CDD01/CDD03)
- F - 24000/9000 ACCOUNT CCS/LA SYSTEM (VOLUME CDD01/CDD02/CDD03)
- G - 36000/13500 ACCOUNT CCS/LA SYSTEM (VOLUME CDD01/CDD02/CDD03)
- H - 60000/18000 ACCOUNT CCS/LA SYSTEM (VOLUME CDD01)
- I - CLEAR CCS SYSTEM FILES FOR CUSTOMER PARAMETERIZATION
- J - CLEAR CCS/LA SYSTEM FILES FOR CUSTOMER PARAMETERIZATION
- Z - EXIT

SELECTION =

The operator types the letter to the left of the configuration required for the system being built. For example, if a 12,000 account delinquent master file will be required on the system, the operator types:

A

and presses (CR).

In this case, the system will display the following message:

\*

\* THE 12000 ACCOUNT SYSTEM BUILD IS IN PROGRESS

This process will take 3-4 minutes to complete. When complete, the system will display the following message:

END QTIL

\* THE 12000 ACCOUNT SYSTEM BUILD IS COMPLETE

\*

\* PROCEED WITH THE INSTALLATION TEST PROCEDURE

The system is now ready to execute the installation test kit procedures.

If the operator selected A, B, C or D from the system configuration menu, proceed to Section 2.

If the operator selected E, F, G or H from the system configuration menu, proceed to Section 3.

# **CCS INSTALLATION TEST KIT DEMONSTRATION**

**2**

## **INTRODUCTION**

The installation test kit system has been parameterized completely and includes a demonstration of features that are usually customer-dependent. For example, the user area of the delinquent master records is defined to contain mother's maiden name, date of birth, make of auto, and four payment amount and date fields. These fields are displayed on the change screen and are used in the payment stacking and the promise-to-pay demonstrations.

The installation of the test kit is verified by a demonstration of the following procedures: daily processing, transaction replay, promise-to-pay, payment stacking, report generator, and movement of accounts to and from history.

The daily processing procedure demonstrates the normal daily processing sequence of events. The following procedures are used to demonstrate and verify daily processing:

- On-line COLECT activities
- Daily cycle procedure
- On-demand report procedure

During the on-line activity, the following screens appear:

- Selection screen
- Borrower's name and address search screen
- Cosigner's name and address search screen
- Borrower's master screen
- Financial data screen
- Collector activity screen
- Borrower's change screen
- Cosigner screen
- Supervisor screen

The following COLECT functions are demonstrated during the on-line activity, which establishes the data for the transaction file and the reports:

- Collector, clerical, and supervisor levels of usage
- Account accessing by automatic mode, borrower's last name, cosigner's last name, and account number
- Scheduling of an account to be reviewed later
- Skipping to the next queue
- Collector nonfinancial data changing via the change screen
- Clerical nonfinancial data changing via the change screen
- Entering permanent comments
- Entering action code, result code, letter code, dates, amounts, and comments
- Creating a cosigner record
- Generating letters to borrowers

- Promise-to-pay scheduling
- Requesting a detail list of a selected account via the supervisor screen
- Requesting an update from the tape archives via the supervisor screen

The daily cycle procedure performs file updates, report generation of the daily reports, and generation of the daily assignment files. During this procedure, accounts become inactive through the update process. These inactive accounts are moved to the history tape archives by executing the history procedures. The inactive accounts are then reactivated and updated from the history archive tape.

The on-demand report procedure creates the trend analysis report, write-off report, daily assignment list, account summary list, weekly and monthly collector statistic and queue loading. These reports together with the reports generated during the daily cycle procedure are used to verify the installation of CCS by comparing the results with the reports in the report section of this manual. The reports match if the daily processing procedure has been followed exactly.

The transaction replay procedure demonstrates the ability to restore the system to its original state in the event that a catastrophic system failure should occur. Transaction replay provides the capability of replaying the transactions of collectors, clerks, and supervisors made prior to a failure against a backup disk system. The reports created during this procedure can be verified by comparing these reports with the reports created during the daily processing procedure.

The promise-to-pay demonstration exercises the logic involved with a promise-to-pay that has been kept and a promise-to-pay that has been broken using collector input of the actual promise-to-pay and the financial update procedure.

The payment stacking procedure is an example of what can be established by the user in the customer-defined user area. The installation test kit has been defined to update and stack payments made to accounts in historical sequence using the financial update procedure. This procedure verifies the updating of the user area.

The report generator procedure provides the user with the ability to generate general reports based on data in the delinquent master file. This demonstration creates a program that already exists as an on-demand report. After the report is created by the report generator, it can be verified with the output from the summary account list created during the daily processing demonstration.

The entire test kit demonstration takes approximately two hours. Care must be taken to follow the procedures exactly. If a mistake is made, it appears in the activity reports produced and not in the installation test kit output examples. More catastrophic deviations (for example, executing procedures out of sequence) require restarting the entire installation test kit from the beginning using the backup packs. These packs must be copied as described in the CCS test kit instructions.

## **CCS DEMONSTRATION MATERIAL**

This installation test kit consists of CCS released material and is used for product demonstration. Material necessary to execute the installation test procedures is provided with the test kit (table 2-1).

In addition, two scratch tapes must be available to complete the demonstration. The reports produced by these procedures will be identical to those contained in appendix B.

After all of the installation test kit procedures have been executed, the system is ready for customer parameterization.

TABLE 2-1. CCS MATERIAL LIST

| Tapes For Product Demonstration              |
|--|
| UPDATE test - Reactivate from SUMHIST        |
| UPDATE test - Reactivate inactive accounts   |
| UPDATE 400 - Nonfinancial update             |
| UPDATE 500 - Financial update promise-to-pay |
| UPDATE 500 - Financial update payment stack  |

# CCS REPORT DESCRIPTION

Table 2-2 describes each report, in sequence, produced by the installation test kit. Areas of special interest are noted. The report output from installation test kit processing matches the report output examples in appendix B when all procedure steps are followed.

## CCS PARAMETERIZATION

The following paragraphs describe the liberties taken in the parameterization of the installation test kit. They are intended to be representative of the parameterization capabilities that exist in CCS.

### INSTALLATION TEST KIT PARAMETERIZATION

The following are descriptions of the parameterization of the activity verification table, the decision table, and the utility file.

### ACTIVITY VERIFICATION TABLE

The activity verification table lists the various possible action codes with result codes and associated COLECT reactions. (The action and result codes, A1 through A4 and R1 through R4, are samples only.) Supervisor review (SR), busy (BZ), and promise-to-pay (PP) codes are included in a standard installation.

TABLE 2-2. CCS INSTALLATION TEST KIT REPORT DESCRIPTIONS

| Number     | Description  |
|------------|--|
| B-DC-RPT1  | Shows file space audit report.   |
| B-RP-RPT1  | The delinquent trend analysis shows the movement of the dollar value of accounts within aging groups by queue. All of the accounts in this test delinquent master are from 1977.   |
| B-RP-RPT2  | Same as B-RP-RPT1 however, report is by product rather than queue.   |
| B-RP-RPT3  | The eligible for write-off reports show summary information for all accounts that are eligible for write-off. The report is printed by queue assigned account type.  |
| B-RP-RPT4  | The daily assignment report shows summary information on accounts within queues. This report is produced showing all accounts.   |
| B-RP-RPT5  | The account summary list shows a one-line entry for all accounts in the delinquent master. There are 90 accounts in this demo system.  |
| B-RP-RPT6  | The weekly collector statistics report contains no information because no collector activity has taken place.  |
| B-RP-RPT7  | The monthly collector statistics report is the same as B-RP-RPT6.  |
| B-RP-RPT16 | Queue loading report is a summary of the number of accounts per queue for six working days.  |
| B-DC-RPT2  | The collector changes to accounts show changes made to accounts through the change screen by collector. The time usage report shows start and stop time and actions taken per collector. The collector statistics report summarizes the number of times the collectors use the action and result codes. These reports reflect on-line COLECT activity in the daily processing demonstration. |
| B-DC-RPT3  | Shows letters that are generated as a result of promise-to-pay entries made.   |
| B-DC-RPT4  | The activity block report shows status of the overflow activity file.  |
| B-DC-RPT5  | The daily master file update report shows the results of the complete update. Note the four accounts that are inactive due to release, write-off or satisfy. These accounts are eligible for movement to history.  |
| B-DC-RPT6  | The delinquent record content report shows the accounts that are inactive due to the complete update.  |

TABLE 2-2. CCS INSTALLATION TEST KIT REPORT DESCRIPTIONS (Contd)

| Number     | Description   |
|------------|---|
| B-DC-RPT7  | The delinquent record content report is the result of the DL supervisor function. This function requests a detailed listing for the account of Craig G. Smith.  |
| B-DC-RPT8  | Shows an update from history in the account of Margaut M. Sehuquiest.   |
| B-HS-RPT1  | The account movement to history report is a summary list of inactive account that moved to history.   |
| B-RP-RPT8  | The delinquent trend analysis is similar to B-RP-RPT1 however, account totals have increased due to the addition of 23 new accounts from update.  |
| B-RP-RPT9  | The delinquent trend analysis is similar to B-RP-RPT2 however, account totals have increased due to the addition of 23 new accounts from update.  |
| B-RP-RPT10 | The eligible for write-off report no longer shows accounts that were moved to history.  |
| B-RP-RPT12 | The account summary list report is the same as B-RP-RPT5 however, the promise-to-pay data entered in section 1 now appears in the account of Winston A. Martindale and Edward Morgan.   |
| B-RP-RPT13 | The weekly collector statistics report shows the on-line activity entered to date for the week.   |
| B-RP-RPT14 | The monthly collector statistics report shows the on-line activity entered to date for the month.   |
| B-DC-RPT9  | The daily master file update report shows three accounts, which have been added to the delinquent master. Two of these accounts have been previously moved to history and are on the B-HS-RPT1 report.  |
| B-DC-RPT10 | The daily master file update report for 4xx codes, also known as nonfinancial update. Two accounts have been updated with new business names and phone numbers.   |
| B-DC-RPT11 | The active accounts updated from history show accounts that have been updated from tape archives, as a result of a supervisor entered UH (update history) function.   |
| B-RP-RPT11 | The daily assignment for queue shows current queue assignments for ten accounts. The default parameter of 5 in the DALT record of UTIFIL may also be used.  |
| B-HS-RPT2  | The reports show accounts that have been updated from history archives (tape).  |
| B-DC-RPT12 | The collector changes to the accounts report is run following transaction replay. The collector changes, time usage and collector statistics reports are identical to those appearing in B-DC-RPT2.   |
| B-DC-RPT13 | The example of letters produced following transaction replay is identical to B-DC-RPT3.   |
| B-DC-RPT14 | The activity block report, produced following transaction replay, is identical to B-DC-RPT4.  |
| B-DC-RPT15 | Daily master file update indicates one account was updated. This is part of the promise-to-pay routine.   |
| B-DC-RPT16 | The daily master file update report for 5xx codes is a financial update. One account is updated with financial information to the customer-defined user area of the delinquent master file. This update is not part of the standard system and, if it is utilized, it must be customer-defined. |
| B-RG-RPG1  | The report generator data name list shows the data names available to the report generator. Items are referenced in the root area of the delinquent master. This data names list is customized to include data elements from the user area of the master file.                                  |
| B-RG-RPG2  | The RG summary account list report is essentially a duplicate of the account summary list report B-RP-RPT5. The differences include the promise-to-pay data on four accounts and the absence of next contact date and review code.  |

Possible action and result codes are as follows:

- The RL under the A1-BZ combination automatically reschedules the account for review x accounts later, where x is defined in the OLPM parameter in the utility file.
- The NC under the A1-R3 combination indicates no change in the next contact date.
- The L under the A4-R4 combination requires a letter to be sent and the C under the A3-R1 combination requires a comment to be entered by the operator.
- The O2 under the A3-R3 combination causes the next contact date to be automatically incremented by two days.
- The DP under the A4-PP combination causes the next contact date, resulting from a promise-to-pay, to be incremented by the number of days contained in the OLPM parameter of the utility file. For example, if a promise-to-pay is made for 10/15/78, the promise-to-pay will not be considered broken unless a payment has not been received by 10/17/78. (See OLPM parameter description.)
- The NA under the A3-PP combination indicates that those two codes are not compatible.

## DECISION TABLE

The decision table is used as part of the daily assignment process to assign accounts to queues and priority of accounts within queues.

The decision table used with the installation test kit makes queue assignments based on the amount delinquent field within the delinquent master. Accounts with amount delinquent less than \$200 are assigned to queue 0001; between \$200 and \$300, to queue 0002; between \$300-\$400 to queue 0003; and over \$400, queue 0004.

### NOTE

Only the six most significant digits of a dollar amount are examined to determine queue assignment. All dollar amounts are nine digits in length. The amount of 0000303.00 has only 000030 examined. The greater than test in the decision table results in that account being assigned to queue 0002, since the dollar amount was not greater than 000030. This appears in the case of the account of James P. Graham.

Priority of accounts within queue are based on the status of promise-to-pay activity. All accounts are assigned a priority of 2000 unless the promise-to-pay flag within the delinquent master shows a broken condition. These account are assigned a priority of 9000.

## UTILITY FILE

The utility file contains parameters that are used throughout the system to control a variety of functions. Each type of parameter is identified by the first four characters of each line. The utility file parameters used in the installation test kit are as follows:

- HDR1, HDR2, HDR3 - These are the system report headings that are used on all reports. Usually, the customer name appears here.
- RSW1 - The parameters contained in this line (R010, S015, W005) represent the number of days that an inactive account (released, satisfied or written-off) remains active on the delinquent master before being written to history.
- ACTC, RESC - These parameters are generated by the process that creates the activity verification table. It is a list of valid action and result codes.
- SALC - These are the salutation codes permitted within the system.
- DALT - This parameter controls the default number of account to print within each queue while generating a daily assignment list.
- SMTH - This parameter controls the number of months an inactive account may remain in history (SLMHIST) before being purged (similar to RSW1).
- TMTH - This parameter controls the number of months an inactive account remains in tape archives before being purged (similar to SMTH).

- UPDY - This is the number of days before acceptance of nonfinancial changes on the complete update tape (value of 999 denotes that nonfinancial changes are not accepted).
- OLPM -This parameter has four parameters embedded in it. Parameter RL06 controls the number of accounts later that an account reappears as a result of a review later collector entry. Parameter P02 controls the number of days delay added to the promise-to-pay date for the next contact date. Parameter C31 controls the maximum number of days in the future that the collector may schedule an account for next contact. Parameter NA controls the function of a NA (no answer) result code. If this parameter is NAY, the NA result code will function the same as the RL (review later) result code. If this parameter is NAN, the NA result code will be treated as any other result code. For these procedures, this parameter has been defined as NAN.
- LTRF - This parameter controls the printing of either a 15 or 16 digit account number and contains information printed in the closing of the collection letters. These are customer-defined.
- LTR1, LTR2 - These parameters contain the valid letter numbers and are generated during the letter creation routines.
- RPTG - This parameter is used by the report generator system to determine what number the next user-generated report will be if that report program is to be saved. These are generated by the report generator procedures.
- Collector ID parameters 0001, 0002, 0003, and 0004 identify valid collector log-ons, the queues they are authorized automatic access to and the access mode (clerical, collector, and supervisor).

## CCS TEST KIT INSTALLATION INSTRUCTIONS

### DAILY PROCESSING DEMONSTRATION

The objective of this section is to demonstrate the normal daily processing sequence of events, from both the operator and collector point of view.

Controlled on-line collector activity against selected accounts is performed and the results (letters, collector statistics, etc.) are available for review.

A complete update takes place causing several accounts to become inactive and migrate to history. An additional update reactivates those accounts.

On-demand reporting further demonstrates the various reporting features.

The status of the system before continuing is as follows:

- Test kit installation is complete.
- The system is autoloaded with 11/01/77.
- The operator is logged in at the master console under CCS20.
- All volumes are ready and mounted.

### NOTE

Unless otherwise instructed, use carriage return (CR) in response to system prompts.

### Daily Cycle Menu - Selection M

Using the DC menu, execute selection M to create the daily assignment files. Accounts must be assigned to queues before any other activity. The test kit decision table makes assignments based on past due amounts. The output will match report number B-DC-RPT1.

### Report Menu - Selections C, D, E, F, G, H, I, J, and M

Using the RP menu, run the selections shown in table 2-3.

Use any terminal other than the master console (if possible) for on-line COLECT activites.

TABLE 2-3. CCS REPORT MENU DEMONSTRATION SELECTIONS

| Selection         | Comments   | Output to Match |                 |          |                            |              |        |                   |     |         |   |             |     |  |
|-------------------|--|-----------------|-----------------|----------|----------------------------|--------------|--------|-------------------|-----|---------|---|-------------|-----|--|
| C                 | Trend analysis-calculate age, carriage return to all prompts.  | N/A             |                 |          |                            |              |        |                   |     |         |   |             |     |  |
| D                 | Trend analysis report printed by queue.  | B-RP-RPT1       |                 |          |                            |              |        |                   |     |         |   |             |     |  |
| E                 | Trend analysis report printed by product.  | B-RP-RPT2       |                 |          |                            |              |        |                   |     |         |   |             |     |  |
| F                 | Eligible/actual write-off report. Use the following in response to prompts:  | B-RP-RPT3       |                 |          |                            |              |        |                   |     |         |   |             |     |  |
|                   | <table> <thead> <tr> <th><u>Prompt</u></th> <th><u>Response</u></th> </tr> </thead> <tbody> <tr> <td>report =</td> <td>1 (eligible for write-off)</td> </tr> <tr> <td>as-of-date =</td> <td>110177</td> </tr> <tr> <td>days delinquent =</td> <td>120</td> </tr> <tr> <td>print =</td> <td>2 (print the report by queue assigned account type)</td> </tr> <tr> <td>subtotals =</td> <td>Yes</td> </tr> </tbody> </table> | <u>Prompt</u>   | <u>Response</u> | report = | 1 (eligible for write-off) | as-of-date = | 110177 | days delinquent = | 120 | print = | 2 (print the report by queue assigned account type) | subtotals = | Yes |  |
| <u>Prompt</u>     | <u>Response</u>  |                 |                 |          |                            |              |        |                   |     |         |   |             |     |  |
| report =          | 1 (eligible for write-off)   |                 |                 |          |                            |              |        |                   |     |         |   |             |     |  |
| as-of-date =      | 110177   |                 |                 |          |                            |              |        |                   |     |         |   |             |     |  |
| days delinquent = | 120  |                 |                 |          |                            |              |        |                   |     |         |   |             |     |  |
| print =           | 2 (print the report by queue assigned account type)  |                 |                 |          |                            |              |        |                   |     |         |   |             |     |  |
| subtotals =       | Yes  |                 |                 |          |                            |              |        |                   |     |         |   |             |     |  |

| OK (CR)                        | Response to verification request.  |
| (CR)                           | System calculates next contact date.                                       |
| DA                             | Display last activity entered.   |
| NQ (CR)                        | Attempt to skip to next queue but none exists. COLECT exits automatically. |

#### NOTE

UTIFIL parameters for collector 0002 show authorization for queue 0002 only.

Log into COLECT and select a NEWS option. Enter collector ID 0003 and perform the following activities (as a supervisor).

| <u>Display/Keyboard</u> | <u>Comments</u>   |
|-------------------------|---|
| A (CR)                  | Select automatic mode. Master screen for Craig G. Smith appears.  |
| SS (CR)                 | Bring in supervisor screen.   |
| 1,0004 (CR)             | Change queue assignment for this account from 0003 to 0004.   |
| DL (CR)                 | Request a detail list of this account to be printed later.  |
| NA (CR)                 | Bring in next account in queue. Master screen for Major Wine and Liquor Store appears.                        |
| A3,R1 (CR)              | Enter action/result code combination that requires comment only. (See action/result code verification table.) |
| WILLING TO PAY (CR)     | Enter comment.  |
| NQ (CR)                 | Attempt to skip to next queue but none exists, COLECT exits automatically.                                    |

Log into COLECT and select a NEWS option. Enter collector ID 0004 and perform the following activities as a clerical (access to change screens only).

| <u>Display/Keyboard</u> | <u>Comments</u>   |
|-------------------------|---|
| A (CR)                  | Select automatic mode. Change screen for David Radin appears. |
| 3,LA JOLLA,CA (CR)      | Change city state.  |
| DS (CR)                 | Go to selection screen.                                       |
| E (CR)                  | Exit COLECT.  |

From the master console, log on with a CCS20 user ID and save the transaction file, TRANFL, for later use in transaction replay.

Label a scratch tape TRANFL SAVE and mount it (with write ring) on unit 0.

Execute the following under UTIL:

```
READY>LIST      (CR)
  FN =TRANFL    (CR)
  VL =          (CR)
  M =          (CR)
  L =TAPEO     (CR)
  F =U        (CR)
```

Daily Cycle Menu - Selections L, A, B, C, D, G, H, I, and M

Using the DC menu, run the selections shown in table 2-4.

TABLE 2-4. CCS DAILY CYCLE MENU DEMONSTRATION SELECTIONS

| Selection | Comments   | Output to Match |
|-----------|--|-----------------|
| L         | Sort transaction file in proper order for collector reports.   | N/A             |
| A         | Daily collector activities reports. Collector changes to accounts, time usage, collector statistics. Carriage return to zero counts. Compare reports with entries made during on-line activity.  | B-DC-RPT2       |
| B         | Print requested letters. (Respond YES to print all letters.)   | B-DC-RPT3       |
| C         | Add collector activities to the activity file.   | B-DC-RPT4       |
| D         | Process complete update tape from A/R system. This update releases four accounts from active status to show history processing. In addition, one account is reactivated from the on-line history file SUMHIST (tape entitled 'UPDATE TEST - REACTIVATE FROM SUMHIST'). | B-DC-RPT5       |
| G         | Delinquent record content report inactive accounts. These accounts are eligible for movement to history.   | B-DC-RPT6       |
| H         | Delinquent record contents report supervisor requests. This report is a result of the DL action.   | B-DC-RPT7       |
| I         | Update accounts from history. The account of Margaut M. Sehuquist that was added during the update process was found to have been previously delinquent and is updated from the SUMHIST on-line history file.  | B-DC-RPT8       |
| M         | Create daily assignment files for records that have been added to the delinquent master.   | N/A             |

## History Menu - Selection A

Label a scratch tape '11/01/77 HISTORY' and mount (with write ring) it on unit 0.

Using a HS menu, execute selection A to transfer the inactive account to history files. The four accounts that become inactive as a result of the update process are moved to the history files. The output will match number B-HS-RPT1.

## HISTORY DEMONSTRATION

### Report Menu - Selections C, D, E, F, H, I, and J

Reset the system date to 12/01/77 by performing the following procedures:

Log off CCS by responding EX to the system prompt.

Perform a manual interrupt.

The system responds:

MI

Enter:

DATE (CR)

The system responds:

ENTER DATE/TIME MMDDYYHHMM

Enter:

120177hhmm

The system responds:

DATE: dd mon yy TIME: hhmm:ss

Log on at the master console with a CCS20 user ID.

Using the RP menu, run the selections shown in table 2-5.

### Daily Cycle Menu - Selections D, E, I, and M

Reset the system date to 12/15/77.

Log on at the master console with a CCS20 user ID.

Using the DC menu, run the selections shown in table 2-6.

TABLE 2-5. CCS POST HISTORY REPORT MENU SELECTIONS

| Selection         | Comments  | Output to Match |          |          |                            |              |        |                   |     |         |   |             |     |  |
|-------------------|---|-----------------|----------|----------|----------------------------|--------------|--------|-------------------|-----|---------|---|-------------|-----|--|

TABLE 2-6. CCS POST HISTORY DAILY CYCLE MENU SELECTIONS

| Selection | Comments   | Output to Match |
|-----------|--|-----------------|
| D         | Complete update tape from A/R system. The effect of this update is to reactivate three of the four accounts that went to history files (tape entitled UPDATE TEST - REACTIVATE INACTIVE ACCOUNTS). | B-DC-RPT9       |
| E         | Process 400 series - nonfinancial update tape. The effect of this update is to change selected fields within specific accounts (tape entitled UPDATE 400 - NONFINANCIAL UPDATE).                   | B-DC-RPT10      |
| I         | Update accounts from history.  | B-DC-RPT11      |
| M         | Create daily assignment files.   | N/A             |

## Report Menu - Selection G

Using the RP menu, run the selection shown in table 2-7.

Use a terminal other than the master console and log into COLECT, and select a NEWS option.

Enter collector ID 0003 (supervisor) and perform the following functions to reactivate accounts from the history tape archives.

| <u>Display/Keyboard</u> | <u>Comments</u>  |
|-------------------------|--|
| B,ALEXANDER (CR)        | Name search for Alexander.                             |
| 1 (CR)                  | Select from displayed list.                            |
| DF (CR)                 | Bring in financial screen, note date to history entry. |
| SS (CR)                 | Bring in supervisor screen.                            |
| UH (CR)                 | Request update from history tape archives.             |
| DS (CR)                 | Return to selection screen.                            |
| B,O'LOUGHLIN (CR)       | Name search for O'Loughlin.                            |
| 1 (CR)                  | Select from displayed list.                            |
| DF (CR)                 | Bring in financial screen note date to history entry.  |
| SS (CR)                 | Bring in supervisor screen.                            |
| UH (CR)                 | Request update from history tape archives.             |
| DS (CR)                 | Return to selection screen.                            |
| E (CR)                  | Exit.  |

## History Menu - Selection B

Log onto the master console with a CCS20 user ID.

Mount tape labeled 11/01/77 HISTORY on unit 0.

Using the HS menu, execute selection B from the history menu to update accounts in the tape archives. The output will match report number B-HS-RPT2.

## TRANSACTION REPLAY DEMONSTRATION

In the event of a system failure where the transaction file (TRANFL) is recoverable, transactions can be replayed against the master file on backup disk packs, thereby restoring the system to its original condition.

A second backup transaction file (TRNBCK) is also provided with the system. The daily transactions are logged into this file, as well as TRANFL. This file is optional and may be deleted by the customer.

The status of the system before continuing should be as follows:

- The backup disk packs should be ready and mounted.
- The system date is reset to 11/01/77.

TABLE 2-7. CCS POST ASSIGNMENT REPORT MENU SELECTIONS

| Selection | Comments  | Output to Match |
|-----------|---|-----------------|
| G         | Daily assignment report. Respond 010 to prompt for number of accounts to print. The default value of 5 in the DALT record in UTIFIL may also be used. | B-RP-RPT11      |

- The tape labeled TRANFL SAVE is mounted on unit 0.
- The operator has logged in at master console under CCS20.

Clear the transaction file under UTIL by executing the following:

```
READY > CLEAR (CR)
FN = > TRANFL (CR)
VL = > (CR)
READY > CLEAR (CR)
FN = > TRNBCK (CR)
VL = > (CR)
```

Restore the transaction file from tape by executing the following:

```
READY > LOAD (CR)
FN = > TRANFL (CR)
VL = > (CR)
I = > TAPEO (CR)
M = > (CR)
```

Rewind tape on unit 0.

```
READY > LOAD (CR)
FN = > TRNBCK (CR)
VL = > (CR)
I = > TAPEO (CR)
M = > (CR)
READY > EX (CR)
```

Run the following transaction replay:

REQUEST =>TRNPLY

The system responds:

```
TOTAL ACTIVITIES UPDATED = 4
TOTAL CHANGES UPDATED = 9
TOTAL OTHER RECORDS = 0
TOTAL NOT UPDATED = 0
```

#### NOTE

The system has been restored onto the backup disk packs. Since processing will be continued on these packs, they should be relabeled as master packs, and the original master packs should be relabeled as backup packs.

Daily Cycle Menu - Selections L, M, A, B, and C

Using the DC menu, run the selections shown in table 2-8.

#### COLECT FUNCTIONS DEMONSTRATION

COLECT functions perform controlled activity on selected accounts. They ensure that all available functions in COLECT and the CCS reference manual perform as expected.

TABLE 2-8. CCS DAILY CYCLE MENU SELECTIONS AFTER TRANSACTION REPLAY

| Selection | Comments  | Output to Match |
|-----------|---|-----------------|
| L         | Sort the transaction file in proper order for collector report.   | N/A             |
| M         | Create the daily assignment file.                                 | N/A             |
| A         | Daily collector activity reports, carriage return to zero counts. | B-DC-RPT12      |
| B         | Print requested letters. (Respond ALL to print all letters.)      | B-DC-RPT13      |
| C         | Add collector activities to activity file.                        | B-DC-RPT14      |

The status of the system before continuing should be as follows:

- The system date remains 11/01/77.
- Use terminal, other than the master console, if possible.

To demonstrate collector activity, log into COLECT, select a news option, and perform the following activities:

| <u>Display/Keyboard</u>            | <u>Comments</u>   |
|------------------------------------|---|
| Log in with collector<br>id = 0001 | Collector 0001 has automatic access to queues 0001 and 0002.  |
| A (CR)                             | Select automatic. Master screen for George Bailey appears.  |
| RL (CR)                            | Review later. Utility file parameter OLPM shows RL value as 06; therefore, this account reappears six accounts from now.                    |
|                                    | Master screen for William Hunt appears.   |
| DF (CR)                            | Display financial screen.   |
| A1,R4 (CR)                         | Action/result code combination requires a letter to be sent.  |
| H,91,110177,200 (CR)               | Entry of invalid letter number - System responds with INVALID LETTER CODE,REENTER ADDRESSEE,LETTER CODE,LETTER DATE,LETTER AMOUNT           |
| H,01,110177,200 (CR)               | Send letter 01 to home address with date and amount.  |
| OK (CR)                            | Respond to verification prompt.   |
| CS (CR)                            | No cosigner exists for this account. The cosigner screen will be displayed with blank cosigner data.  |
| 1,JOHNS,PHILLIP (CR)               | Enter name of relative to cosigner.   |
| 6,6664231774 (CR)                  | Enter telephone number of cosigner.   |
| (CR)                               | Return to master screen.  |
| CS (CR)                            | Return to cosigner screen and verify name and telephone number of new cosigner.   |
| NA (CR)                            | Next account, master screen for Glenn Friedman appears.   |
| P1,PERMANENT<br>COMMENT 1 (CR)     | Enter permanent comment 1.  |
| NA (CR)                            | Next account, master screen for Alma M. Broom appears.  |
| P2,PERMANENT<br>COMMENT 2 (CR)     | Enter permanent comment 2.  |
| NA (CR)                            | Next account, master screen for Lorraine A. Trippi appears.   |
| P3,PERMANENT<br>COMMENT 3 (CR)     | Enter permanent comment 3.  |
| NA (CR)                            | Next account, master screen for Lewis W. Randall appears.   |
| A2,R2 (CR)                         | Action/result code combination accepts a new next contact date from the collector or adds one to the current date if a date is not entered. |
| 111577 (CR)                        | Enter a next contact date of 11/15/77.  |
| (CR)                               | Master screen for Randall indicates next contact date of 11/15/77.  |
| NA (CR)                            | Master screen for William R. Prezioso appears.  |
| NA (CR)                            | Next account, master screen for George Bailey appears, result of the RL function entered at the beginning of this demonstration.            |

|         |   |
|---------|---|
| NQ (CR) | Next queue, master screen for Frederic H. Hawkins appears.  |
| OA (CR) | Other account, master screen for Cornelius Eleary appears. This function is useful when an account owner has multiple accounts. |
| DS (CR) | Display selection screen.   |
| E (CR)  | Exit COLECT and log off.  |

To demonstrate clerical activity, log in with collector ID 0004 and perform the following activities:

| <u>Display/Keyboard</u>       | <u>Comments</u>   |
|-------------------------------|---|
| Log in with collector ID 0004 | Collector 0004 is defined as a clerical, permitted access to change screens only in queue 0004. |
| B,FLAMHOLTZ (CR)              | Name search for Carl Flamholtz.   |
| 1 (CR)                        | Select from a displayed list. Change screen for Flamholtz appears.                              |
| 01,APT #7 (CR)                | Change address 1.   |
| 02,SECOND STREET (CR)         | Change address 2.   |
| DS (CR)                       | Display selection screen.   |
| N,0397288631234567 (CR)       | Select account by account search. Change screen for Carl Flamholtz appears.                     |
| 4,54321 (CR)                  | Change zip code.  |
| DS (CR)                       | Display selection screen.   |
| C,STEINMAN (CR)               | Cosigner name search for Steinman.  |
| C (CR)                        | Indicate selection correct. Master screen for Carl Flamholtz appears.                           |
| CS (CR)                       | Display cosigner screen.  |
| 11,4444 8th STREET (CR)       | Change street name on cosigner screen.  |
| 12,SAN DIEGO,CA (CR)          | Change city name.   |
| DS (CR)                       | Display selection screen.   |
| N,0397288631234567 (CR)       | Account number search for Carl Flamholtz.   |
| CS (CR)                       | Cosigner screen appears.  |
| NA (CR)                       | Next account, change screen for David Radin appears, is first account in assigned queue 0004.   |
| DS (CR)                       | Display selection screen.   |
| E (CR)                        | Exit and log off.   |

Supervisor on-line COLECT activity is identical with normal collector activity with the following exceptions:

- Access to supervisor change screen.
- DL function that requests a detailed list for a specific account to be printed.
- UH function that requests an account in the tape history archives be reactivated to an active status (demonstrated in the history demonstration).

#### PROMISE-TO-PAY LOGIC DEMONSTRATION

The promise-to-pay logic states that once a promise-to-pay is received on an account with a commitment date and amount, that account is flagged as having a pending promise-to-pay. If no payment is received by the promise-to-pay date, or if the payment is less than the promised amount, the promise is considered broken. In all other cases it is considered kept.

The system reaction to broken or kept promises to pay is a customer-defined option and requires parameterization of both the decision table and DACRTE program.

The effect of a broken promise-to-pay, in this test kit, is to assign the highest priority to the account so that during the daily assignment process (selection M of the daily menu) the account appears at the top of its queue.

To accomplish this demonstration a promise-to-pay is entered into two separate accounts, both with the same commitment date. A payment satisfying the promise is posted against one account but not the other. The daily assignment process assigns a higher priority to the account with the broken promise.

The system date remains 11/01/77.

Create the promise-to-pay from the collector terminal by performing the following activities:

Log into COLECT and select a NEWS option.

| <u>Display/Keyboard</u>       | <u>Comments</u>   |
|-------------------------------|---|
| Log in with collector ID 0003 | Supervisor with automatic access to queue 0003.   |
| A (CR)                        | Automatic mode, master screen for Craig B. Smith appears.   |
| A2,PP (CR)                    | Promise-to-pay received from owner.   |
| 1115,25 (CR)                  | Promise-to-pay by date and promised amount.   |
| OK (CR)                       | Response to verification prompt.  |
| DF (CR)                       | Display financial screen, note promise-to-pay fields:<br><br>FLAG = Y<br>MADE = 11/01/77<br>BY DATE = 11/15/77<br>AMT = 25.00 |
| DS                            | Display selection screen.   |
| B,MAJOR'S                     | Name search for Major's Wine and Liquor Store.  |
| 1                             | Select from a displayed list. The master screen for Major's Wine and Liquor Store appears.                                    |
| A2,PP (CR)                    | Promise-to-pay received from owner.   |
| 1115,35 (CR)                  | Promise-to-pay by date and promised amount.   |
| OK (CR)                       | Response to verification prompt.  |
| DF (CR)                       | Display financial screen note promise-to-pay fields:<br><br>FLAG = Y<br>MADE = 11/01/77<br>BY DATE = 11/15/77<br>AMT = 35.00  |
| DS                            | Display selection screen.   |
| E                             | Exit COLECT.  |

To execute a financial update from the master console, perform the following activities:

| <u>Display/Keyboard</u>         | <u>Comments</u>   |
|---------------------------------|---|
| Change system date to 111777    | Set system date to date past commitment date. Log on the master console with a CCS20 user ID.   |
| Selection F of daily cycle menu | Perform a financial update using the tape entitled UPDATE 500 - FINANCIAL UPDATE PROMISE TO PAY. Tape is mounted on unit 0. This posts a payment of \$25 dated 11/15/77 against the account of Craig B. Smith. The report produced will match B-DC-RPT15. |
| Selection M of daily cycle menu | Create new daily assignments based on financial update.   |

Log into COLECT from the collector console, select a NEWS option, and perform the following activities:

| <u>Display/Keyboard</u>          | <u>Comments</u>  |
|----------------------------------|--|
| Log in with collector<br>ID 0003 | Supervisor with access to queue 0003.  |
| A (CR)                           | Automatic, master screen for Major's Wine and Liquor Store appears.  |
| DF (CR)                          | Display financial screen, note promise-to-pay fields:<br><br>FLAG = B<br>MADE = 11/01/77<br>BY DATE = 11/15/77<br>AMT = 35.00<br><br>This account had a broken promise and was assigned a priority of 9000, which forced it to the top of the queue. |
| NA (CR)                          | Next account, master screen for Craig B. Smith appears.  |
| DF (CR)                          | Display financial screen. note promise-to-pay fields:<br><br>FLAG = K<br>MADE = 11/01/77<br>BY DATE = 11/15/77<br>AMT = 25.00<br><br>This account was formerly at the top of this queue. The kept promise-to-pay lowered its priority.               |
| DS (CR)                          | Display selection screen.  |
| E (CR)                           | Exit and log off.  |

#### PAYMENT STACKING DEMONSTRATION

Payment stacking is the process by which payments made on accounts are kept in the user area of the delinquent master file in a historical sequence. These payments are displayed on the financial screen with the most current payment at the beginning of the list, the oldest payment at the bottom of the list.

This is a customer-defined option and requires customization of CCSPYT, UPD500 and SCRFILE.

The user area of the delinquent master of the test kit is modified with files for the amount and date of the last four payments. These fields are displayed on the financial screen under the heading PAYMENT HISTORY.

The test delinquent master contains one payment in the account of James P. Graham. A financial update is run, which posts three additional payments against the account and the payments stacked by date.

The status of the system before continuing should be as follows:

- The system date is set to 11/01/77.
- The financial update tape entitled UPDATE 500 - FINANCIAL UPDATE PAYMENT STACK is mounted on unit 0.

To verify the current payment history, log into COLECT from the collector console, select a NEWS option, and perform the following activities:

| <u>Display/Keyboard</u>            | <u>Comments</u>  |
|------------------------------------|--|
| Log in with collector<br>id = 0003 | Supervisor logged in.  |
| B,GRAHAM (CR)                      | Name search from selection screen for James P. Graham.   |
| 1 (CR)                             | Select Graham from displayed list.   |
| DF (CR)                            | Display financial screen, note entry under financial history heading shows two payments: \$110 on 10/15/77 and \$55 on 10/01/77. |

DS (CR) Bring in selection screen.

E (CR) Exit and log off.

Log on the master console with a CCS20 user ID.

Using the DC menu, execute the F selection to update the financial printed review report. The output will match report number B-DC-RPT16.

To review the update results, log into COLECT from the collector console, select a NEWS option, and perform the following activities:

| <u>Display/Keyboard</u>          | <u>Comments</u>   |
|----------------------------------|---|
| Log in with collector<br>ID 0003 | Supervisor logged in.   |
| B,GRAHAM (CR)                    | Name search for James P. Graham.  |
| 1 (CR)                           | Select from list.   |
| DF (CR)                          | Display financial screen; three payments have been added. The payments are displayed with the most current appearing first. |
| DS (CR)                          | Display selection screen.   |
| E CR                             | Log off.  |

## REPORT GENERATOR DEMONSTRATION

Selections K and L of the on-demand report menu are the customer link to the CCS report generator subsystem. This subsystem allows the user to design, execute and retain report generator programs.

Selection K of the on-demand report menu requires the user to respond to prompts for report selection, totaling, and sorting parameters. Selection L executes the constructed program. More detailed information is available in the CCS reference manual and operator's guide.

Using the report generator, this demonstration creates a program, which produces a report (RG Summary Account List). Such a report already exists on the on-demand report menu. The two reports should then be compared.

The status of the system before continuing should be as follows:

- The system date is set to 11/17/77.
- \*BATCH,F is initiated.
- The collector has logged in from the master console with CCS20.

The following procedure creates the report generator summary account list:

1. Using the RP menu, execute selection K to create the report generator program.

2. The system responds:

```
*REPORT GENERATOR PROGRAMS WILL BE CREATED
****OPERATOR - (BATCH HOST MUST BE ACTIVE BEFORE PROCEEDING)
*          TO ACTIVATE BATCH HOST
*          MI, *BATCH,F
*
*  RESPOND: 'N' CARRIAGE RETURN - IF BATCH HOST IS NOT ACTIVE
*          CARRIAGE RETURN ONLY - TO CONTINUE
READY? >
```

\*\*\*\* OPERATOR - FOLLOW THE INSTRUCTIONS AS THEY APPEAR ON THE SCREEN END UTIL

3. Enter the following after the prompts:

PRINT DATA NAME LIST? ENTER Y OR N  
>Y (CR)  
SAVE GENERATED REPORT PROGRAM? ENTER Y OR N  
>N (CR)  
ENTER DATA NAMES FOR RPT (NAME1,NAME2, (CR) OR MAX OF 3 NAMES PER LINE  
ENTER REPEAT TO REENTER ALL DATA NAMES OR  
ENTER C TO CONTINUE OR  
ENTER A TO ABORT  
>MACCT,MNAM,MDLDT (CR)  
NEXT  
>MADLQ,MPYOF,MQUE (CR)  
NEXT  
>MPPD,MPPA (CR)  
NEXT  
>C (CR)  
ENTER SORT FIELD NAME (KEY1,A,KEY2,D (CR))  
MAJOR TO MINOR A(ASCENDING) OR D(DESCENDING)

ENTER A TO ABORT  
>C (CR)

4. The system responds:

\* THE REPORT GENERATOR PROGRAMS HAVE BEEN CREATED  
\* THE REPORT GENERATOR PROGRAMS WILL BE BATCHED  
JOB NO.=J001  
JOB NO.=J002  
END UTIL  
  
\*  
\*\*\*\* OPERATOR - SELECTION L MUST NOW BE RUN TO EXECUTE THE REPORT  
READY?>

5. Run selection L on the RP menu.

## CLEAR FILES - READY SYSTEM

The data files used for the installation test kit procedures must be cleared before the system may be parameterized for customer use.

The operator must log onto the master console with a \$\$ user ID.

The operator types in response to system prompt

SC

and presses (CR).

The system configuration menu is displayed as follows:

### SYSTEM CONFIGURATION MENU

BEFORE MAKING A SELECTION FROM THIS MENU BE SURE THE AUXILIARY DISK PACK(S) HAVE BEEN INITIALIZED WITH THE CORRECT VOLUME LABEL OR LABELS FOR THE SYSTEM WHICH YOU WILL SELECT. ALL DISK PACKS SHOULD BE MOUNTED AND READY.

- A - 1200 ACCOUNT CCS SYSTEM (VOLUME CDD01)
- B - 24000 ACCOUNT CCS SYSTEM (VOLUME CDD01/CDD02)
- C - 36000 ACCOUNT CCS SYSTEM (VOLUME CDD01/CDD02)
- D - 78000 ACCOUNT CCS SYSTEM (VOLUME CDD01)
- E - 12000/9000 ACCOUNT CCS/LA SYSTEM (VOLUME CDD01/CDD03)
- F - 24000/9000 ACCOUNT CCS/LA SYSTEM (VOLUME CDD01/CDD02/CDD03)
- G - 36000/13500 ACCOUNT CCS/LA SYSTEM (VOLUME CDD01/CDD02/CDD03)
- H - 60000/18000 ACCOUNT CCS/LA SYSTEM (VOLUME CDD01)
- I - CLEAR CCS SYSTEM FILES FOR CUSTOMER PARAMETERIZATION
- J - CLEAR CCS/LA SYSTEM FILES FOR CUSTOMER PARAMETERIZATION
- Z - EXIT

SELECTION =>

The operator types

I

and presses (CR).

The following messages will be displayed:

OPERATOR - A JOB WILL BE BATCHED IN THIS PROCEDURE TO PURGE THE PROGRAM LIBRARY. THE BATCH HOST MUST BE ACTIVE BEFORE PROCEEDING. TO ACTIVATE THE BATCH HOST, PERFORM

MI, \*BATCH,F

RESPOND: 'N' CARRIAGE RETURN - IF BATCH HOST IS NOT ACTIVE  
CARRIAGE RETURN ONLY - TO CONTINUE

READY? >

THE DATA FILES WILL BE CLEARED

THE FILES WILL BE INITIALIZED FOR START OF PARAMETERIZATION  
END QUIL.

OPERATOR - WHEN THE SELECTION IS COMPLETE, USE THE UTILITY COMMAND 'BATS' TO CHECK THE PROGRESS OF THE JOB NUMBERED LISTED BELOW. WHEN THE STATUS IS NO LONGER 'BEING SENT', USE THE UTILITY COMMAND 'PRINT' TO PRINT THE JOB. VERIFY THE JOB COMPLETED WITHOUT ERROR.

JOB NO. = J001  
END UTIL

CCS SYSTEM FILES ARE READY FOR PARAMETERIZATION

# CCS/LA INSTALLATION TEST KIT DEMONSTRATION

3

## INTRODUCTION

The installation test kit system has been parameterized completely and includes a demonstration of features that are usually customer-dependent. For example, the user area of the delinquent master records is defined to contain mother's maiden name, date of birth, make of auto, and four payment amount and date fields. These fields are displayed on the change screen and are used in the payment stacking and the promise-to-pay demonstrations.

The installation of the test kit is verified by a demonstration of the following procedures: daily processing, transaction replay, promise-to-pay, payment stacking, report generator, and movement of accounts to and from history. The Legal and Agency verification procedures simulate 14 months of processing on ten selected "written-off" accounts from the CCS delinquent master.

The daily processing procedures demonstrate the normal daily processing sequence of events. The following procedures are used to demonstrate and verify the daily processing process:

- On-line COLECT activities
- Daily cycle procedure
- On-demand report procedure

During the on-line activity, the following screens appear:

- Selection screen
- Borrower's name and address search screen
- Cosigner's name and address search screen
- Borrower's master screen
- Financial data screen
- Collector activity screen
- Borrower's change screen
- Cosigner screen
- Supervisor screen

The following COLECT functions are demonstrated during the on-line activity which establishes the data for the transaction file and the reports:

- Collector, clerical, and supervisor levels of usage
- Account accessing by automatic mode, borrower's last name, cosigner's last name, and account number
- Scheduling of an account to be reviewed later
- Skipping to the next queue
- Collector nonfinancial data changing via the change screen
- Clerical nonfinancial data changing via the change screen
- Entering permanent comments
- Entering action code, result code, letter code, dates, amounts, and comments
- Creating a cosigner record

- Generating letters to borrowers
- Promise-to-pay scheduling
- Requesting a detail list of a selected account via the supervisor screen
- Requesting an update from the tape archives via the supervisor screen

The daily cycle procedure performs file updates, report generation of the daily reports, and generation of the daily assignment files. During this procedure, accounts become inactive through the update process. These inactive accounts are moved to the history tape archives by executing the history procedures. The inactive accounts are then reactivated and updated from the history archive tape.

The on-demand report procedure creates the trend analysis report, write-off report, daily assignment list, account summary list, weekly and monthly collector statistics, and queue loading. These reports together with the reports generated during the daily cycle procedure are used to verify the installation of CCS by comparing the results with the reports in the report section of this manual. The reports match if the daily processing procedure has been followed exactly.

The transaction replay procedure demonstrates the ability to restore the system to its original state in the event that a catastrophic system failure should occur. Transaction replay provides the capability of replaying the transactions of collectors, clerks, and supervisors made prior to a failure against a backup disk system. The reports created during this procedure can be verified by comparing these reports with the reports created during the daily processing procedure.

The promise-to-pay demonstration exercises the logic involved with a promise-to-pay that has been kept and a promise-to-pay that has been broken using collector input of the actual promise-to-pay and the financial update procedure.

The payment stacking procedure is an example of what can be established by the user in the customer-defined user area. The installation test kit has been defined to update and stack payments made to accounts in historical sequence using the financial update procedure. This procedure verifies the updating of the user area.

The mini-report generator procedure provides the user with the ability to generate general reports based on data in the delinquent master file. This demonstration creates a program that already exists as an on-demand report. After the report is created by the report generator, it can be verified with the output from the summary account list created during the daily processing demonstration.

The entire test kit demonstration takes approximately three hours. Care must be taken to follow the procedures exactly. If a mistake is made, it appears in the activity reports produced and not in the installation test kit output examples. More catastrophic deviations (for example, executing procedures out of sequence) require restarting the entire installation test kit from the beginning, using the backup packs. These packs must be copied as described in the CCS/LA test kit instructions.

The Legal and Agency portion of the installation test kit is divided into five sections.

- The first section will require the user to create client file records through the maintenance menu selection.
- The second section will execute an update against the CCS delinquent master (as it exists following the CCS portion of the installation test kit) and will assign a written-off status to ten accounts. An extract process in the LA subsystem will be run which will bring the written-off account into the LA delinquent master.
- The third section will require that the user play the part of both operator and collector. Beginning with the date 061078, financial transactions simulating both host and collector origin will be entered into the system. This will be done for a 14 month period (the system date must be changed between transactions). The effect of these transactions on both client and borrower records will be visible on the report output.
- The fourth section will consist of inactivating a client record and finally purging that client from the system.
- The fifth section will simulate transaction replay and execute those menu procedures not previously run.

## CCS/LA DEMONSTRATION MATERIAL

The CCS/LA installation test kit consists of released material and is used for the installation of LA programs and product demonstration. All materials necessary to execute the CCS/LA installation test procedures are provided by the test kit (table 3-1).

In addition, two scratch tapes must be available to complete demonstration. The reports produced by these procedures will be identical to those contained in appendixes B and C.

After the CCS/LA installation test kit procedures have been executed, the system is ready for customer parameterization.

TABLE 3-1. CCS/LA MATERIAL LIST

| Tapes For Product Demonstration |                                   |
|---------------------------------|-----------------------------------|
| UPDATE TEST                     | - Reactivate from SUMHIST         |
| UPDATE TEST                     | - Reactivate inactive accounts    |
| UPDATE 400                      | - Nonfinancial update             |
| UPDATE 500                      | - Financial update promise-to-pay |
| UPDATE 500                      | - Financial update payment stack  |
| UPDATE                          | - Write-off 10 accounts           |
| LUD500                          | - First financial update          |
| LUD500                          | - Second financial update         |

## CCS/LA REPORT DESCRIPTION

Table 3-2 describes each report, in sequence, produced by the installation test kit. Areas of special interest are noted. The report output from installation test kit processing matches the report output examples in appendixes B and C, when all procedure steps are followed.

## CCS/LA PARAMETERIZATION

The following paragraphs describe the liberties taken in the parameterization of the installation test kit. They are intended to be representative of the parameterization capabilities that exist in CCS/LA.

### INSTALLATION TEST KIT PARAMETERIZATION

The following are descriptions of the parameterization of the activity verification table, the decision table, and the utility file.

### ACTIVITY VERIFICATION TABLE

The CCS activity verification table (refer to appendix C) lists the various possible action codes with result codes and associated COLECT reactions. (The action and result codes, A1 through A4 and R1 through R4, are samples only.) Supervisor review (SR), busy (BZ), and promise to pay (PP) codes are included in a standard installation.

Possible action and result codes are as follows:

- The RL under the A1-BZ combination automatically reschedules the account for review x accounts later, where x is defined in the OLPM parameter in the utility file.
- The NC under the A1-R3 combination indicates no change in the next contact date.
- The L under the A4-R4 combination requires a letter to be sent and the C under the A3-R1 combination requires a comment to be entered by the operator.
- The O2 under the A3-R3 combination causes the next contact date to be automatically incremented by two days.
- The DP under the A4-PP combination causes the next contact date, resulting from a promise-to-pay, to be incremented by the number of days contained in the OLPM parameter of the utility file. For example, if a promise-to-pay is made for 10/15/77, the promise-to-pay will not be considered broken unless a payment has not been received by 10/17/77. (See OLPM parameter description.)
- The NA under the A3-PP combination indicates that those two codes are not compatible.

The LA activity verification table will be a duplicate of the table used in CCS.

TABLE 3-2. CCS/LA INSTALLATION TEST KIT REPORT DESCRIPTIONS

| Number     | Description  |
|------------|--|
| B-DC-RPT1  | Shows file space audit report.   |
| B-RP-RPT1  | The delinquent trend analysis shows the movement of the dollar value of accounts within aging groups by queue. All of the accounts in this test delinquent master are from 1977.   |
| B-RP-RPT2  | Same as B-RP-RPT1; however, report is by product rather than queue.  |
| B-RP-RPT3  | The eligible for write-off reports show summary information for all accounts that are eligible for write-off. The report is printed by queue assigned account type.  |
| B-RP-RPT4  | The daily assignment report shows summary information on accounts within queues. This report is produced showing all accounts.   |
| B-RP-RPT5  | The account summary list shows a one-line entry for all accounts in the delinquent master. There are 90 accounts in this demo system.  |
| B-RP-RPT6  | The weekly collector statistics report contains no information because no collector activity has taken place.  |
| B-RP-RPT7  | The monthly collector statistics report is the same as B-RP-RPT6.  |
| B-RP-RPT16 | The queue loading report is a summary of the number of accounts per queue for six working days.  |
| B-DC-RPT2  | The collector changes to accounts show changes made to accounts through the change screen by collector. The time usage report shows start and stop time and actions taken per collector. The collector statistics report summarizes the number of times the collectors use the action and result codes. These reports reflect changes made during the on-line COLECT activity in the daily processing demonstration. |
| B-DC-RPT3  | Shows letters that are generated as a result of promise-to-pay entries made.   |
| B-DC-RPT4  | The activity block report shows status of the overflow activity file.  |
| B-DC-RPT5  | The daily master file update report shows the results of the complete update. Note the four accounts that are inactive due to release, write-off or satisfy. These accounts are eligible for movement to history.  |
| B-DC-RPT6  | The delinquent record content report shows the accounts that are inactive due to the complete update.  |
| B-DC-RPT7  | The delinquent record content report is the result of the DL supervisor function. This function requests a detailed listing for the account of Craig G. Smith.   |
| B-DC-RPT8  | Shows an update from history in the account of Margaut M. Sehuquiest.  |
| B-HS-RPT1  | The account movement to history report is a summary list of inactive accounts that moved to history.   |
| B-RP-RPT8  | The delinquent trend analysis is similar to B-RP-RPT1; however, account totals have increased due to the addition of 23 new accounts from update.  |
| B-RP-RPT9  | The delinquent trend analysis is similar to B-RP-RPT2; however, account totals have increased due to the addition of 23 new accounts from update.  |
| B-RP-RPT10 | The eligible for write-off report no longer shows accounts that were moved to history.   |
| B-RP-RPT12 | The account summary list report is the same as B-RP-RPT5; however, the promise-to-pay date entered in section 1 now appears in the accounts of Winston Martindale and Edward Morgan.   |
| B-RP-RPT13 | The weekly collector statistics report shows the on-line activity entered to date for the week.  |

TABLE 3-2. CCS/LA INSTALLATION TEST KIT REPORT DESCRIPTIONS (Contd)

| Number       | Description  |
|--------------|--|
| B-RP-RPT14   | The monthly collector statistics report shows the on-line activity entered to date for the month.  |
| B-DC-RPT9    | The daily master file update report shows three accounts which have been added to the delinquent master. Two of these accounts have been previously moved to history and are on the B-HS-RPT1 report.  |
| B-DC-RPT10   | The daily master file update report for 4xx codes, also known as nonfinancial update. Two accounts have been updated with new business names and phone numbers.  |
| B-DC-RPT11   | The active accounts updated from history shows accounts that have been updated from tape archives, as a result of a supervisor entered UH (update history) function.   |
| B-RP-RPT11   | The daily assignment for queue shows current queue assignments for ten accounts. This report is used to verify the on-line activities that take place in the COLECT functions demonstration. The default parameter of 5 on the DALT record of UTIFIL may also be used.                         |
| B-HS-RPT2    | The reports show accounts that have been updated from history archives (tape).   |
| B-DC-RPT12   | The collector changes to the accounts report is run following transaction replay. The collector changes, time usage and collector statistics reports are identical to those appearing in B-DC-RPT2.  |
| B-DC-RPT13   | The example of letters produced following transaction replay is identical to B-DC-RPT3.  |
| B-DC-RPT14   | The activity block report, produced following transaction replay, is identical to B-DC-RPT4.   |
| B-DC-RPT15   | The daily master file update report shows one account was updated. This is part of the promise-to-pay routine.   |
| B-DC-RPT16   | The daily master file update report for 5xx codes is a financial update. One account is updated with financial information to the customer-defined user area of the delinquent master file. This update is not part of the standard system and if it is utilized, it must be customer defined. |
| B-RG-RPG1    | The report generator data name list shows the data names available to the report generator. Items are referenced in the root area of the delinquent master. This data names list is customized to include data elements from the user area of the master file.                                 |
| B-RG-RPG2    | The RG summary account list report is essentially a duplicate of the account summary list report B-RP-RPT5. The differences include the promise to pay data on four accounts and the absence of next contact date and review code.   |
| C-LADC-RPT1  | The daily master file update report shows the ten accounts on the CCS delinquent master which have been updated with a written-off status.   |
| C-LALD-RPT2  | The LA extract program shows ten records written and the client referral list, a one page per account summary of the ten written-off CCS accounts.   |
| C-LALO-RPT1  | The daily assignment list shows that all unassigned accounts have been assigned to queue 0003.   |
| C-LALD-RPT3  | The LA batch update audit trail shows the effect of the client assignment transactions.  |
| C-LALD-RPT15 | The delinquent content report for Harold Balvelt is a result of a supervisor request (DL function).  |
| C-LALD-RPT4  | The LA batch update audit trail shows the effect of the \$25.00 direct payment on the amount delinquent and the current balance of the customer master record, and the amount collected field of the client record.  |

TABLE 3-2. CCS/LA INSTALLATION TEST KIT REPORT DESCRIPTIONS (Contd)

| Number       | Description  |
|--------------|--|
| C-LALD-RPT5  | The LA batch update audit trail shows a further reduction of the amount delinquent and current balance fields, as a result of an indirect payment and an increase of the amount collected field.   |
| C-LALD-RPT6  | The LA batch update audit trail shows the effect of a nonrecoverable court cost on a client record. Nonrecoverable court costs are accumulated in the client record only. There is no effect on the customer record.   |
| C-LALD-RPT7  | The LA batch update audit trail shows the effect of a recoverable court cost transaction. In the customer record, the amount delinquent and the current balance due are increased by the transaction amount and accumulated in the client record.  |
| C-LALD-RPT8  | The LA batch update audit trail shows the effect of a direct payment on a customer account. The amount delinquent and the balance due are reduced by the transaction amount. If either field is reduced below zero, the amount becomes zero. The client is credited in the amount collected field.   |
| C-LALD-RPT9  | The LA batch update audit trail shows on-line and transactions from the host applied to accounts and how the accounts were affected. The collector ID identifies the transaction source.   |
| C-LALD-RPT10 | The LA batch update audit trail shows results of the fee/commission reversal transactions.   |
| C-LALO-RPT2  | The complete payment received report and the direct payment received report are printed. All successfully processed transactions (direct and indirect) are recorded in LAPMTFIL and are used to produce these two reports. LAPMTFIL is cleared when the reports are complete. The report selection is normally run at month end. The report is in client number order. |
| C-LALO-RPT3  | The extract report is an audit trail. The inventory report by customer lists all LA accounts and their assigned client; the inventory report by attorney/agency lists all clients and their assigned accounts.   |
| C-LALO-RPT4  | The recovery analysis shows collection activity by client during the 12 previous months.   |
| C-LALD-RPT11 | The LA batch update audit trail shows the results of client reassignment transactions.   |
| C-LALD-RPT12 | The LA batch update audit trail shows the effect of seven months of transactions which were accumulated at the host computer.  |
| C-LALO-RPT5  | The complete payments received report shows all direct and indirect payments received since this selection was last run; the direct payments report shows only the direct payments received.   |
| C-LALO-RPT6  | The extract report is an audit trail; the inventory by customer, by client, shows current assignments.   |
| C-LALO-RPT7  | The recovery analysis report based on the last 12 months of activity is printed.   |
| C-LALH-RPT1  | The client purge report is a complete listing of any client record which is being deleted from the LAClient.   |
| C-LD-RPT13   | The daily collector activity report shows collector changes to accounts made through the change screen during the online LEGAL activity.   |
| C-LD-RPT14   | The activity block report shows the status of the overflow activity block.   |
| C-LD-RPT8    | The eligible/actual for write-off report shows the accounts eligible for write-off, depending on the parameters entered by the operator.   |
| C-LD-RPT9    | The daily assignment report shows queue assignments for LA accounts.   |
| C-LD-RPT10   | The summary account list, a one line summary of all LA accounts.   |

TABLE 3-2. CCS/LA INSTALLATION TEST KIT REPORT DESCRIPTIONS (Contd)

| Number     | Description   |
|------------|---|
| C-LD-RPT11 | The weekly collector statistics report summarizes on-line collector activity for the week.  |
| C-LD-PRT12 | The monthly collector statistics report summarizes on-line collector activity for the month.  |
| C-LD-RPT13 | The queue loading report shows distribution of accounts by queue, number of accounts not worked, and number of accounts scheduled to be worked. |
| C-LD-RPT16 | The daily collector activity report runs after transaction replay, and is identical to C-LD-RPT13.  |
| C-LD-RPT17 | The add collector activity to activity file report runs after transaction replay, and is identical to C-LD-RPT14.                               |

#### DECISION TABLE

The CCS decision table is used as part of the daily assignment process to assign accounts to queues and the priority of accounts within queues.

The CCS decision table used with the installation test kit makes queue assignments based on the amount delinquent field within the delinquent master. Accounts with amount delinquent less than \$200 are assigned to queue 0001; between \$200 and \$300, to queue 0002; between \$300-\$400 to queue 0003; and over \$400, queue 0004.

#### NOTE

Only the six most significant digits of a dollar amount are examined to determine queue assignment. All dollar amounts are nine digits in length. The amount of 0000303.00 has only 000030 examined. The greater than test in the decision table results in that account being assigned to queue 0002, since the dollar amount was not greater than 000030. This appears in the case of the account of James P. Graham.

Priority of accounts within queue are based on the status of promise-to-pay activity. All accounts are assigned a priority of 2000 unless the promise to pay flag within the delinquent master shows a broken condition. These accounts are assigned a priority of 9000.

The LA decision table will differ from its CCS counterpart. In the LA table, all accounts which have not been assigned to a client will be assigned to queue 0003. Assigned accounts will be placed in queue 0001 or 0002, depending on the accounts balance due amount (\$100 = 0002; \$100 = 0001). Accounts with no balance due (satisfied) will be placed in queue 0004.

#### UTILITY FILE

The CCS utility file contains parameters that are used throughout the system to control a variety of functions. Each type of parameter is identified by the first four characters of each line. The utility file parameters used in the installation test kit are as follows:

- HDR1, HDR2, HDR3 - These are the system report headings that are used on all reports. Usually, the customer name appears here.
- RSW1 - The parameters contained in this line (R010, S015, W005) represent the number of days that an inactive account (released, satisfied or written-off) remains active on the delinquent master before being written to history.
- ACTC, RESC - These parameters are generated by the process that creates the activity verification table. It is a list of valid action and result codes.
- SALC - These are the salutation codes permitted within the system
- DALT - This parameter controls the default number of accounts to print within each queue while generating a daily assignment list.

- SMTH - This parameter controls the number of months an inactive account may remain in history (SUMHIST) before being purged (similar to RSW1).
- TMTH - This parameter controls the number of months an inactive account remains in tape archives before being purged (similar to SMTH).
- UPDY - This is the number of days before acceptance of nonfinancial changes on the complete update tape (value of 999 denotes that nonfinancial changes are not accepted).
- OLPM - This parameter has four parameters embedded in it. Parameter RL06 controls the number of accounts later an account reappears as a result of a review later collector entry. Parameter P02 controls the number of days delay added to the promise-to-pay date for the next contact date. Parameter C31 controls the maximum number of days in the future the collector may schedule an account for next contact. Parameter NA controls the function of a NA (no answer) result code. If this parameter is NAY, the NA result code will function the same as the RL (review later) result code. If this parameter is NAN, the NA result code will be treated as any other result code. For these procedures, this parameter has been defined as NAN.
- LTRF - This parameter controls the printing of either a 15 or 16 digit account number, and contains information printed in the closing of the collection letters. These are customer-defined.
- LTR1, LTR2 - These parameters contain the valid letter numbers and are generated during the letter creation routines.
- RPTG - This parameter is used by the report generator system to determine what number the next user-generated report will be if that report program is to be saved. These are generated by the report generator procedures.
- Collector ID parameters 0001, 0002, 0003, and 0004 identify valid collector log-ons, the queues they are authorized automatic access to and access mode (clerical, collector, and supervisor).

The LA utility file contains the same data as the CCS utility file; however, it will contain two additional parameters unique to the LA subsystem:

- LACL - This parameter in the form xx,xx,xx,xx,xx, nnn allows for up to five different client types to be distinguished based on the first two digits of the client number. In this test system, the values are LA,AA,00. The nnn parameter contains the number of days an inactive account will remain in the client file before being moved to history.
- LAC1 through LAC5 - These parameters provide a description of each of the client types identified in LACL. In this test system, the descriptions are LAC1ATTORNEY COLLECTION FIRM, LAC2COLLECTION AGENCY, and LAC3IN-HOUSE COLLECTIONS.

These parameters are used in the inventory reporting modules.

## CCS/LA INSTALLATION TEST KIT DEMONSTRATION

### 1. The Legal and Agency programs must be installed by executing the following:

Mount the tape entitled LEGAL AND AGENCY INSTALL on unit 0. At the system console enter:

EX - Exit CCS

Perform a manual interrupt. The system responds:

MI  
>

Enter:

\*BATCH,6 (CR)

The system responds:

\* CTO, BEGIN LEGAL 3.0 APPLICATION INSTALL.....

When the procedure is complete, the following message is displayed:

\* CTO, 3.0 LEGAL APPLICATION INSTALLED.....

### 2. The disk packs must be saved (copied) to a set of backup packs before proceeding to the CCS/LA test kit demonstration procedures. Refer to the Operator's/Collector's Guide for this procedure.

# CCS INSTALLATION TEST KIT DEMONSTRATION

## DAILY PROCESSING DEMONSTRATION

The objective of this section is to demonstrate the normal daily processing sequence of events, from both the operator and collector point of view.

Controlled on-line collector activity against selected accounts is performed and the results (letters, collector statistics, etc.) are available for review.

A complete update takes place causing several accounts to become inactive and migrate to history. An additional update reactivates those accounts.

On-demand reporting further demonstrates the various reporting features.

The status of the system before continuing is as follows:

- Test kit installation is complete.
- The system is autoloaded with 11/01/77.
- The operator is logged in at the master console under CCS20.
- All volumes are ready and mounted.

### NOTE

Unless otherwise instructed, use carriage return (CR) in response to all system prompts.

## Daily Cycle Menu - Selection M

Using the DC menu, execute selection M to create the daily assignment files. Accounts must be assigned to queues before any other activity. The test kit decision table makes assignments based on past due amounts. The output will match report number B-DC-RPT1.

## Report Menu - Selections C, D, E, F, G, H, I, J, and M

Using the RP menu, run the selections shown in table 3-3.

Use any terminal other than the master console (if possible) for on-line COLECT activities.

Log into COLECT by using a blank user ID and select a NEWS option.

Enter collector ID 0001 and perform the following activities:

| <u>Display/Keyboard</u> | <u>Comments</u>  |
|-------------------------|--|
| A (CR)                  | Select automatic mode. Master screen for the account of Winston A. Martindale appears. |
| DC (CR)                 | Bring in change screen.  |
| 13,MILLER (CR)          | Change mother's maiden name to Miller.   |
| 15,FORD (CR)            | Change make of auto to Ford.   |
| A1,PP (CR)              | Promise-to-pay made.   |
| 111577,100.00 (CR)      | Promise-to-pay date and amount.  |
| OK (CR)                 | Response to verification request.  |
| H,02,110177,100 (CR)    | Request letter 02 to be sent to home address with date and amount.                     |
| OK (CR)                 | Response to verification request.  |
| NA (CR)                 | Next account in automatic queue sequence. Master screen for Edward Morgan appears.     |

TABLE 3-3. CCS/LA REPORT MENU DEMONSTRATION SELECTIONS

| Selection       | Comments   | Output to Match |                 |        |                              |            |          |                 |       |       |   |           |       |  |
|-----------------|--|-----------------|-----------------|--------|------------------------------|------------|----------|-----------------|-------|-------|---|-----------|-------|--|
| C               | Trend analysis-calculate age, carriage return to all prompts.  | N/A             |                 |        |                              |            |          |                 |       |       |   |           |       |  |
| D               | Trend analysis report printed by queue.  | B-RP-RPT1       |                 |        |                              |            |          |                 |       |       |   |           |       |  |
| E               | Trend analysis report printed by product.  | B-RP-RPT2       |                 |        |                              |            |          |                 |       |       |   |           |       |  |
| F               | Eligible/actual write-off report. Use the following in response to prompts:  | B-RP-RPT3       |                 |        |                              |            |          |                 |       |       |   |           |       |  |

| 1,0004 (CR)             | Change queue assignment for this account from 0003 to 0004.   |
| DL (CR)                 | Request a detail list of this account to be printed later.  |
| NA (CR)                 | Bring in next account in queue. Master screen for Major Wine and Liquor Store appears.                        |
| A3,R1 (CR)              | Enter action/result code combination that requires comment only. (See action/result code verification table.) |
| WILLING TO PAY (CR)     | Enter comment.  |
| NQ (CR)                 | Attempt to skip to next queue but none exists. COLECT exits automatically.                                    |

Log into COLECT and select a NEWS option.

Enter collector ID 0004 and perform the following activities as a clerical (access to change screens only).

| <u>Display/Keyboard</u> | <u>Comments</u>   |
|-------------------------|---|
| A (CR)                  | Select automatic mode. Change screen for David Radin appears. |
| 3,LA JOLLA,CA (CR)      | Change city state.  |
| DS (CR)                 | Go to selection screen.                                       |
| E (CR)                  | Exit COLECT.  |

From the master console, log on with a CCS20 user ID, and save the transaction file, TRANFL, for later use in transaction replay.

Label a scratch tape TRANFL SAVE and mount it (with write ring) on unit 0.

Run the following under UTIL:

```
READY > LIST      (CR)
      FN = TRANFL (CR)
      VL =
      M =
      L = TAPE0   (CR)
      F = U       (CR)
```

#### Daily Cycle Menu - Selections L, A, B, C, D, G, H, I, and M

Using the DC menu, run the selections shown in table 3-4.

#### History Menu - Selection A

Label a scratch tape 11/01/77 HISTORY and mount (with write ring) on unit 0.

Using the HS menu, execute selection A to transfer the inactive accounts to history files. The four accounts that become inactive as a result of the update process are moved to the history files. The output will match number B-HS-RPT1.

### HISTORY DEMONSTRATION

#### Report Menu - Selections C, D, E, F, H, I, and J

Reset the system date to 12/01/77 by performing the following procedures:

Log off CCS by responding EX to the system prompt.

Perform a manual interrupt.

TABLE 3-4. CCS/LA DAILY CYCLE MENU DEMONSTRATION SELECTIONS

| Selection | Comments   | Output to Match |
|-----------|--|-----------------|
| L         | Sort transaction file in proper order for collector reports.   | N/A             |
| A         | Daily collector activities reports. Collector changes to accounts, time usage, collector statistics. Carriage return to zero counts. Compare reports with entries made during on-line activity.  | B-DC-RPT2       |
| B         | Print requested letters. (Respond YES to print all letters.)   | B-DC-RPT3       |
| C         | Add collector activities to the activity file.   | B-DC-RPT4       |
| D         | Process complete update tape from A/R system. This update releases four accounts from active status to show history processing. In addition, one account is reactivated from the on-line history file SUHMIST (tape entitled UPDATE TEST - REACTIVATE FROM SUMHIST). | B-DC-RPT5       |
| G         | Delinquent record content report inactive accounts. These accounts are eligible for movement to history.   | B-DC-RPT6       |
| H         | Delinquent record contents report supervisor requests. This report is a result of the DL action.   | B-DC-RPT7       |
| I         | Update accounts from history. The account of Margaut M. Sehuquist that was added during the update process was found to have been previously delinquent and is updated from the SUMHIST on-line history file.  | B-DC-RPT8       |
| M         | Create daily assignment files for records that have been added to the delinquent master.   | N/A             |

The system responds:

MI

Enter:

DATE (CR)

The system responds:

ENTER DATE/TIME MMDDYYHHMM

Enter:

120177 hhmm

The system responds:

DATE: dd mon yy TIME: hhmm:ss

Log on at the master terminal with a CCS20 user ID.

Using the RP menu, run the selections shown in table 3-5.

#### Daily Cycle Menu - Selections D, E, I, and M

Reset the system date to 12/15/77.

Using the DC menu, run the selections shown in table 3-6.

#### Report Menu - Selection G

Using the RP menu, run the selection shown in table 3-7.

TABLE 3-5. CCS/LA POST HISTORY REPORT MENU SELECTIONS

TABLE 3-6. CCS/LA POST HISTORY DAILY CYCLE MENU SELECTIONS

| Selection | Comments   | Output to Match |
|-----------|--|-----------------|
| D         | Complete update tape from A/R system. The effect of this update is to reactivate three of the four accounts that went to history files (tape entitled UPDATE TEST - REACTIVATE INACTIVE ACCOUNTS). | B-DC-RPT9       |
| E         | Process 400 series - Nonfinancial update tape. The effect of this update is to change selected fields within specific accounts (tape entitled UPDATE 400 - NONFINANCIAL UPDATE).                   | B-DC-RPT10      |
| I         | Update accounts from history.  | B-DC-RPT11      |
| M         | Create daily assignment files.   | N/A             |

TABLE 3-7. CCS/LA POST ASSIGNMENT REPORT MENU SELECTION

| Selection | Comments  | Output to Match |
|-----------|---|-----------------|
| G         | Daily assignment report. Respond 010 to prompt for the number of accounts to print. The default value of 5 in the DALT record in UTIFIL may also be used. | B-RP-RPT11      |

Use a terminal other than the master console and log into COLECT and select a NEWS option.

Enter collector ID 0003 (supervisor) and perform the following functions to reactivate accounts from the history tape archives:

| <u>Display/Keyboard</u> | <u>Comments</u>  |
|-------------------------|--|
| B,ALEXANDER (CR)        | Name search for Alexander.                             |
| 1 (CR)                  | Select from displayed list.                            |
| DF (CR)                 | Bring in financial screen, note date to history entry. |
| SS (CR)                 | Bring in supervisor screen.                            |
| UH (CR)                 | Request update from history tape archives.             |
| DS (CR)                 | Return to selection screen.                            |
| B,O'LOUGHLIN (CR)       | Name search for O'Loughlin.                            |
| 1 (CR)                  | Select from displayed list.                            |
| DF (CR)                 | Bring in financial screen, note date to history entry. |
| SS (CR)                 | Bring in supervisor screen.                            |
| UH (CR)                 | Request update from history tape archives.             |
| DS (CR)                 | Return to selection screen.                            |
| E (CR)                  | Exit.  |

#### History Menu - Selection B

Mount tape labeled 11/01/77 HISTORY on unit 0.

From the master console, log on with a CCS20 user ID.

Using the HS menu, execute selection B to update accounts in the tape archives. The output will match report number B-HS-RPT2.

### TRANSACTION REPLAY DEMONSTRATION

In the event of a system failure where the transaction file (TRANFL) is recoverable, transactions can be replayed against the master file on backup disk packs, thereby restoring the system to its original condition.

A second backup transaction file (TRNBCK) is also provided with the system. The daily transactions are logged into this file, as well as TRANFL. This file is optional and may be deleted by the customer.

The status of the system before continuing should be as follows:

- The backup disk packs should be ready and mounted.
- The system date is reset to 11/01/77.
- The tape labeled TRANFL SAVE is mounted on unit 0.
- The operator has logged in at master console under CCS20.

Clear the transaction file under UTIL by executing the following:

```
READY      CLEAR    (CR)
FN=        TRANFL   (CR)
VL=
READY      CLEAR    (CR)
FN=        TRNBCK  (CR)
VL=        (CR)
```

Restore the transaction file (from tape) by executing the following:

```
READY      LOAD     (CR)
FN=        TRANFL   (CR)
VL=
I=         TAPE0   (CR)
M          (CR)
```

Rewind tape on unit 0.

```
READY      LOAD     (CR)
FN=        TRNBCK  (CR)
VL=
I=         TAPE0   (CR)
M          (CR)
READY      EX       (CR)
```

Run the following transaction replay:

```
REQUEST    TRNPLY
```

The system responds:

```
TOTAL ACTIVITIES UPDATED = 4
TOTAL CHANGES UPDATED = 9
TOTAL OTHER RECORDS    = 0
TOTAL NOT UPDATED      = 0
```

#### NOTE

The system has been restored onto the backup disk packs. Since processing will be continued on these packs, they should be relabeled as master packs, and the original master packs should be relabeled as backup packs.

Daily Cycle Menu - Selections L, M, A, B, and C

Using the DC menu, run the selections shown in table 3-8.

### COLECT FUNCTIONS DEMONSTRATION

COLECT functions perform controlled activity on selected accounts. They ensure that all available functions in COLECT and the CCS reference manual perform as expected.

TABLE 3-8. CCS/LA DAILY CYCLE MENU SELECTIONS AFTER TRANSACTION REPLAY

| Selection | Comments  | Output to Match |
|-----------|---|-----------------|
| L         | Sort the transaction file in proper order for collector report.   | N/A             |
| M         | Create the daily assignment file.                                 | N/A             |
| A         | Daily collector activity reports, carriage return to zero counts. | B-DC-RPT12      |
| B         | Print requested letters. Respond 'Y' to print all letters.        | B-DC-RPT13      |
| C         | Add collector activities to activity file.                        | B-DC-RPT14      |

The status of the system before continuing should be as follows:

- The system date remains 11/01/77.
- Mount and ready the disk used for transaction replay demonstration.
- Use a terminal other than the master console, if possible.

To demonstrate collector activity, log into COLECT, select a NEWS option, and perform the following activities:

| <u>Display/Keyboard</u>            | <u>Comments</u>   |
|------------------------------------|---|
| Log in with collector<br>id = 0001 | Collector 0001 has automatic access to queues 0001 and 0002.  |
| A (CR)                             | Select automatic. The master screen for George Bailey appears.  |
| RL (CR)                            | Review later. Utility file parameter OLPM shows RL value as 06; therefore, this account reappears six accounts from now.<br><br>Master screen for William Hunt appears. |
| DF (CR)                            | Display financial screen.   |
| A1,R4 (CR)                         | Action/result code combination requires a letter to be sent.  |
| H,91,110177,200 (CR)               | Entry of invalid letter number. System responds with INVALID LETTER CODE, REENTER ADDRESSEE, LETTER CODE, LETTER DATE, LETTER AMOUNT.                                   |
| H,01,110177,200 (CR)               | Send letter 01 to home address with date and amount.  |
| OK (CR)                            | Respond to verification prompt.   |
| CS (CR)                            | No cosigner exists for this account. The cosigner screen will be displayed with blank cosigner data.  |
| 1,JOHNS,PHILLIP (CR)               | Enter name of relative to be cosigner.  |
| 6,6664231774 (CR)                  | Enter telephone number of cosigner.   |
| (CR)                               | Return to master screen.  |
| CS (CR)                            | Return to cosigner screen and verify name and telephone number of new cosigner.   |
| NA (CR)                            | Next account, master screen for Glenn Friedman appears.   |
| P1,PERMANENT<br>COMMENT 1 (CR)     | Enter permanent comment 1.  |
| NA (CR)                            | Next account, master screen for Alma M. Broom appears.  |
| P2,PERMANENT<br>COMMENT 2 (CR)     | Enter permanent comment 2.  |

| <u>Display/Keyboard</u>         | <u>Comments</u>   |
|---------------------------------|---|
| NA (CR)                         | Next account, master screen for Lorraine A. Trippi appears.   |
| P3, PERMANENT<br>COMMENT 3 (CR) | Enter permanent comment 3.  |
| NA (CR)                         | Next account, master screen for Lewis W. Randall appears.   |
| A2,R2 (CR)                      | Action/result code combination accepts a new next contact date from the collector or adds one to current date if a date is not entered. |
| 111577 (CR)                     | Enter a next contact date of 11/15/77.  |
| (CR)                            | Master screen for Randall appears.  |
| NA (CR)                         | Master screen for William R. Prezioso appears.  |
| NA (CR)                         | Next account, master screen for George Bailey appears, result of the RL function entered at the beginning of this demonstration.        |
| NQ (CR)                         | Next queue, master screen for Frederic H. Hawkins appears.  |
| OA (CR)                         | Other account, master screen for Cornelius Eleary appears. This function is useful when an account owner has multiple accounts.         |
| DS (CR)                         | Display selection screen.   |
| E (CR)                          | Exit COLECT and log off.  |

To demonstrate clerical activity, log into COLECT with collector id=0004, select a NEWS option, and perform the following activities:

| <u>Display/Keyboard</u>          | <u>Comments</u>   |
|----------------------------------|---|
| Log in with collector<br>ID 0004 | Collector 0004 is defined as a clerical, permitted access to change screens only in queue 0004. |
| B,FLAMHOLTZ (CR)                 | Name search for Carl Flamholtz.   |
| 1 (CR)                           | Select from a displayed list. Change screen for Flamholtz appears.                              |
| 01,APT #7 (CR)                   | Change address 1.   |
| 02,SECOND STREET (CR)            | Change address 2.   |
| DS (CR)                          | Display selection screen.   |
| N,0397288631234567 (CR)          | Select account by account search. Change screen for Carl Flamholtz appears.                     |
| 4,54321 (CR)                     | Change zip code.  |
| DS (CR)                          | Display selection screen.   |
| C,STEINMAN (CR)                  | Cosigner name search for Steinman.  |
| C (CR)                           | Indicate selection correct. Master screen for Carl Flamholtz appears.                           |
| CS (CR)                          | Display cosigner screen.  |
| 11,4444 8th STREET (CR)          | Change street name on cosigner screen.  |
| 12,SAN DIEGO,CA (CR)             | Change city name.   |
| DS (CR)                          | Display selection screen.   |
| N,0397288631234567 (CR)          | Account number search for Carl Flamholtz.   |
| CS (CR)                          | Cosigner screen appears.  |
| NA (CR)                          | Next account, change screen for David Radin appears, is first account in assigned queue 0004    |

| <u>Display/Keyboard</u> | <u>Comments</u> |
|-------------------------|-----------------|
|-------------------------|-----------------|

DS (CR) Display selection screen.

E (CR) Exit and log off.

Supervisor on-line COLECT activity is identical with normal collector activity with the following exceptions:

- Access to supervisor change screen.
- DL function that requests a detailed list for a specific account to be printed.
- UH function that requests an account in the tape history archives be reactivated to an active status (demonstrated in the history demonstration).

#### PROMISE-TO-PAY LOGIC DEMONSTRATION

The promise-to-pay logic states that once a promise-to-pay is received on an account with a commitment date and amount, that account is flagged as having a pending promise-to-pay. If no payment is received by the promise-to-pay date, or if the payment is less than the promised amount, the promise is considered broken. In all other cases it is considered kept.

The system reaction to broken or kept promises-to-pay is a customer-defined option and requires parameterization of both the decision table and DACRTE program.

The effect of a broken promise-to-pay, in this test kit, is to assign the highest priority to the account so that during the daily assignment process (selection M of the daily menu) the account appears at the top of its queue.

To accomplish this demonstration a promise-to-pay is entered into two separate accounts, both with the same commitment date. A payment satisfying the promise is posted against one account but not the other. The daily assignment process assigns a higher priority to the account with the broken promise.

The system date remains 11/01/77.

Create the promise-to-pay from the collector terminal by performing the following activities:

Log into COLECT and select a NEWS option.

| <u>Display/Keyboard</u> | <u>Comments</u> |
|-------------------------|-----------------|
|-------------------------|-----------------|

Log in with collector ID 0003 Supervisor with automatic access to queue 0003.

A (CR) Automatic mode, master screen for Craig B. Smith appears.

A2,PP (CR) Promise-to-pay received from owner.

1115,25 (CR) Promise-to-pay by date and promised amount.

OK (CR) Response to verification prompt.

DF (CR) Display financial screen, note promise-to-pay fields:

```
FLAG = Y
MADE = 11/01/77
BY DATE = 11/15/77
AMT = 25.00
```

DS Display selection screen.

B,MAJOR'S Name search for Major's Wine and Liquor Store.

1 Select from a displayed list, master screen for Major's Wine and Liquor Store appears.

A2,PP (CR) Promise-to-pay received from owner.

1115,35 (CR) Promise-to-pay by date and promised amount.

OK (CR) Response to verification prompt.

| <u>Display/Keyboard</u>   | <u>Comments</u>  |
|---|--|
| DF (CR)   | Display financial screen note promise to pay fields:<br><br>FLAG = Y<br>MADE = 11/01/77<br>BY DATE = 11/15/77<br>AMT = 35.00   |
| DS  | Display selection screen.  |
| E   | Exit COLECT.   |
| To execute a financial update from the master console, perform the following activities:                        |  |
| <u>Display/Keyboard</u>   | <u>Comments</u>  |
| Reset the date to 111777  | Set system date to date past commitment date. Log on the master console with a CCS20 user ID.  |
| Selection F of daily cycle menu   | Perform a financial update using the tape entitled UPDATE 500 - FINANCIAL UPDATE PROMISE TO PAY. Tape is mounted on unit 0. This posts a payment of \$25 dated 11/15/77 against the account of Craig B. Smith. The report produced will match B-DC-RPT15 |
| Selection M of daily cycle menu   | Create new daily assignments based on financial update.  |
| Log into COLECT from the collector console, select a NEWS option and perform the following activities:          |  |
| <u>Display/Keyboard</u>   | <u>Comments</u>  |
| Log in with collector ID 0003   | Supervisor with access to queue 0003.  |
| A (CR)  | Automatic, master screen for Major's Wine and Liquor Store appears.  |
| DF (CR)   | Display financial screen, note promise-to-pay fields:<br><br>FLAG = B<br>MADE = 11/01/77<br>BY DATE = 11/15/77<br>AMT = 35.00  |
| This account had a broken promise and was assigned a priority of 9000, which forced it to the top of the queue. |  |
| NA (CR)   | Next account, master screen for Craig B. Smith appears.  |
| DF (CR)   | Display financial screen, note promise-to-pay fields:<br><br>FLAG = K<br>MADE = 11/01/77<br>BY DATE = 11/15/77<br>AMT = 25.00  |
| This account was formerly at the top of this queue. The kept promise-to-pay lowered its priority.               |  |
| DS (CR)   | Display selection screen.  |
| E (CR)  | Exit and log off.  |

#### PAYMENT STACKING DEMONSTRATION

Payment stacking is the process by which payments made on accounts are kept in the user area of the delinquent master file in a historical sequence. These payments are displayed on the financial screen with the most current payment at the beginning of the list, the oldest payment at the bottom of the list.

This is a customer-defined option and requires customization of CCSPYT, UPD500 and SCRNFILe.

The user area of the delinquent master of the test kit is modified with fields for the amount and date of the last four payments. These fields are displayed on the financial screen under the heading PAYMENT HISTORY.

The test delinquent master contains one payment in the account of James P. Graham. A financial update is run, which posts three additional payments against the account and the payments stacked by date.

The status of the system before continuing should be as follows:

- The system date is set to 11/01/77.
- The financial update tape entitled UPDATE 500 - FINANCIAL UPDATE PAYMENT STACK is mounted on unit 0.

To verify the current payment history, log into COLECT from the collector console, select a NEWS option, and perform the following activities:

| <u>Display/Keyboard</u>         | <u>Comments</u>  |
|---------------------------------|--|
| Log in with collector id = 0003 | Supervisor logged in.  |
| B,GRAHAM (CR)                   | Name search from selection screen for James P. Graham.   |
| 1 (CR)                          | Select Graham from displayed list.   |
| DF (CR)                         | Display financial screen, note entry under financial history heading shows two payments: \$110 on 10/15/77 and \$55 on 10/01/77. |
| DS (CR)                         | Bring in selection screen.   |
| E (CR)                          | Exit and log off.  |

Log on the master console with a CCS20 user ID.

Using the DC menu, execute the F selection to update the financial printed review report. The output will match report number B-DC-RPT16.

To review the update results, log into COLECT from the collector console, select a NEWS option, and perform the following activities:

| <u>Display/Keyboard</u>       | <u>Comments</u>   |
|-------------------------------|---|
| Log in with collector ID 0003 | Supervisor logged in.   |
| B,GRAHAM (CR)                 | Name search for James P. Graham.  |
| 1 (CR)                        | Select from list.   |
| DF (CR)                       | Display financial screen; three payments have been added. The payments are displayed with the most current appearing first. |
| DS (CR)                       | Display selection screen.   |
| E (CR)                        | Log off.  |

## REPORT GENERATOR DEMONSTRATION

Selections K and L of the on-demand report menu are the customer link to the CCS report generator subsystem. This subsystem allows the user to design, execute and retain report generator programs.

Selection K of the on-demand report menu requires the user to respond to prompts for report selection, totaling, and sorting parameters. Selection L executes the constructed program. More detailed information is available in the CCS reference manual and operator's guide.

Using the report generator, this demonstration creates a program, which produces a report (RG Summary Account List). Such a report already exists on the on-demand report menu. The two reports should then be compared.

The status of the system before continuing should be as follows:

- The system date is set to 11/17/77.
- \*BATCH,F is initiated.
- The collector has logged in from the master console with CCS20.

The following procedure creates the report generator summary account list:

1. Using the RP menu, execute selection K to create the report generator program.
2. The system responds:

```
* REPORT GENERATOR PROGRAMS WILL BE CREATED
**** OPERATOR - (BATCH HOST MUST BE ACTIVE BEFORE PROCEEDING)
*           TO ACTIVATE BATCH HOST
*           MI, *BATCH,F
*
* RESPOND: 'N' CARRIAGE RETURN - IF BATCH HOST IS NOT ACTIVE
*
*           CARRIAGE RETURN ONLY - TO CONTINUE
READY?>
```

\*\*\*\* OPERATOR - FOLLOW THE INSTRUCTIONS AS THEY APPEAR ON THE SCREEN END UTIL

3. Enter the following after the prompts:

```
PRINT DATA NAME LIST? ENTER Y OR N
>Y (CR)
SAVE GENERATED REPORT PROGRAM? ENTER Y OR N
>N (CR)
ENTER DATA NAMES FOR RPT (NAME1,NAME2 (CR)) OR MAX OF 3 NAMES PER LINE

>C (CR)

4. The system responds:

\* THE REPORT GENERATOR PROGRAMS HAVE BEEN CREATED  
\* THE REPORT GENERATOR PROGRAMS WILL BE BATCHED  
JOB NO. = J001  
JOB NO. = J002  
END UTIL

\*  
\*\*\*\* OPERATOR - SELECTION L MUST NOW BE RUN TO EXECUTE THE REPORT  
READY?>

5. Run selection L on the RP menu.

#### CREATE CLIENT FILE RECORDS

Records are created in the LA client file by executing selections from the LA file maintenance menu.

The status of the system before continuing should be as follows:

- The system date is set to 06/10/78.
- All volumes are mounted and ready.
- The operator is logged on at master console under LA user ID.
- The page button (upper right of keyboard) is set in the down (page mode) position.
- The matrix printer is turned off.

| <u>Display/Keyboard</u>                    | <u>Comments</u>   |
|--|---|
| LM (CR)                                    | Enter LA file maintenance menu.   |
| S (CR)                                     | Select client file maintenance.   |
| N,0001 (CR)                                | Search for client 0001.   |
| (CR)                                       | Client does not exist. (CR) indicates a new client record is to be created. Blank client change screen will appear. |
| (CR)                                       | Will position cursor at first change line. "xx,change" can also be used.  |
| COLLECTION INVESTIGATION<br>DEPT (CR) (CR) | Enter firm name.  |
| 1111 FIRST STREET<br>(CR) (CR)             | Enter address line 1.   |
| SAN DIEGO, CALIF (CR) (CR)                 | Enter address line 2.   |

## EXTRACT PROCESS DEMONSTRATION

This section will simulate the extract process which brings written-off accounts from the CCS into the Legal and Agency subsystem.

The status of the system before continuing should be as follows:

- The system date remains 06/10/78.
- All volumes are mounted and ready.
- The operator is logged on at master console under CCS20.
- The page button (upper right of keyboard) is set in the up (scroll mode) position.
- The matrix printer is turned on.
- The tape labeled UPDATE-WRITE-OFF TEN ACCOUNTS is mounted on unit 0.

### CCS Daily Cycle Menu - Selection D

Using the DC menu, run the selection shown in table 3-9.

Log on at the master console with an LA user ID.

### LA Daily Cycle Menu - Selections O and M

Using the LD menu, run the selections shown in table 3-10.

TABLE 3-9. CCS DAILY CYCLE MENU SELECTION

| Selection | Comments   | Output to Match |
|-----------|--|-----------------|
| D         | Complete update with tape labeled UPDATE - WRITE-OFF TEN ACCOUNTS. | C-LADC-RPT1     |

TABLE 3-10. LA DAILY CYCLE MENU SELECTIONS

| Selection | Comments   | Output to Match |
|-----------|--|-----------------|
| O         | Extract process. Update LA with the ten accounts previously written-off in CCS.    | C-LALD-RPT2     |
| M         | Daily assignment will assign all accounts not yet assigned a client to queue 0003. | N/A             |

## LA On-Demand Report Menu - Selection G

Using the LD menu, run the selection shown in table 3-11.

## LA PAYMENT ENTRY DEMONSTRATION

The status of the system before continuing should be as follows:

- The system date remains 06/10/78.
- Use a terminal other than the master console, if possible, and log on with an LA user ID.
- Select a NEWS option.

Enter collector ID 0003 and perform the following functions to assign accounts to clients:

| <u>Display/Keyboard</u> | <u>Comments</u>  |
|-------------------------|--|
| B,CHAMBERS (CR)         | Name search for Chambers.                                  |
| 1 (CR)                  | Select Chambers from screen.                               |
| SS (CR)                 | Display supervisor screen.                                 |
| 01,LA01 (CR)            | Assign this account to LA01.                               |
| DS (CR)                 | Return to selection screen.                                |
| B,BALVELT (CR)          | Name search for Balvelt.                                   |
| 1 (CR)                  | Select Balvelt.  |
| SS (CR)                 | Display supervisor screen.                                 |
| DL                      | Request a detail list of this account to be printed later. |
| 01,0001 (CR)            | Assign account to client 0001.                             |
| DS (CR)                 | Return to selection screen.                                |
| B,YOUNG (CR)            | Name search for Young.                                     |
| 1 (CR)                  | Select Young.  |
| SS (CR)                 | Display supervisor screen.                                 |
| 01,0002 (CR)            | Assign account to client 0002.                             |
| DS (CR)                 | Return to selection screen.                                |
| E (CR)                  | Exit, LEGAL.   |

## LA Daily Cycle Menu - Selection L, N, M, and H

Log onto the master console with an LA user ID.

Using the LD menu, run the selections shown in table 3-12.

Reset the system date to 07/10/78.

TABLE 3-11. LA ON-DEMAND REPORT MENU SELECTION

| Selection | Comments  | Output to Match |
|-----------|---|-----------------|
| G         | Daily assignment list will verify that new accounts are in queue 0003. Reply ALL to program prompt. | C-LALO-RPT1     |

Use a terminal other than the master console, if possible, and perform the following functions to make payment entries.

Enter LA user ID, select a NEWS option, and log onto LEGAL with collector ID 0003.

| <u>Display/Keyboard</u>                        | <u>Comments</u>  |
|--|--|
| P (CR)   | Select payment entry option from selection screen.                               |
| AD (CR)  | Add payment data.  |
| 0270007591234567,<br>0002,01,071078,25<br>(CR) | Enter account number, client number, transaction type, payment date, and amount. |
| SB (CR)  | Perform statement balance function.  |
| OK (CR)  | Transaction is correct, return to selection screen.                              |
| E (CR)   | Exit LEGAL.  |

#### LA Daily Cycle Menu - Selections L and N

Log on the master console with an LA user ID.

Using the LD menu, run the selections shown in table 3-13.

Reset the system date to 08/10/78 by performing the following:

| <u>Display/Keyboard</u>                          | <u>Comments</u>                      |
|--|--------------------------------------|
| (manual interrupt) DATE<br>(CR) 081078 hhmm (CR) | Reset system date to 10 August 1978. |

Use a terminal other than the master console and perform the following procedures.

Enter LA user ID, select a NEWS option, and log on LEGAL with collector ID 0003.

TABLE 3-12. LA DAILY CYCLE MENU SELECTIONS

| Selection | Comments  | Output to Match |
|-----------|---|-----------------|
| L         | Sort transaction.   | N/A             |
| N         | Night batch update will assign accounts with client assignments.  | C-LALD-RPT3     |
| M         | Daily assignment will assign accounts with client assignments to queues depending on total due amounts. | N/A             |
| H         | Delinquent record content report for supervisor requests.   | C-LD-RPT15      |

TABLE 3-13. LA DAILY CYCLE MENU SELECTIONS

| Selection | Comments   | Output to Match |
|-----------|--|-----------------|
| L         | Sort transactions  | N/A             |
| N         | Nightly batch update. Report shows that the direct payment of \$25 reduced the amount delinquent and balance due by that amount; the amount collected is increased by a like amount. | C-LALD-RPT4     |

| <u>Display/Keyboard</u>               | <u>Comments</u>  |
|---------------------------------------|--|
| P (CR)                                | Select payment entry option.   |
| AD (CR)                               | Add payment data.  |
| 0270007591234567,<br>0002,02,,30 (CR) | Enter account number, client number, and transaction code (indirect payment), default to system date and payment amount. |
| SB (CR)                               | Perform statement balancing function.  |
| OK (CR)                               | Transaction is correct; return to selection screen.  |
| E (CR)                                | Exit LEGAL.  |

#### LA Daily Cycle Menu - Selections L and N

Log on the master console with an LA user ID.

Using the LD menu, run the selections shown in table 3-14.

Reset the system date to 09/10/78 by performing the following:

| <u>Display/Keyboard</u>                     | <u>Comments</u>                         |
|---|---|
| (manual interrupt) DATE<br>(CR) 091078 hhmm | Reset system date to 10 September 1978. |

Use a terminal other than the master console and perform the following procedures.

Enter LA user ID, select a NEWS option, and log on LEGAL with collector ID 0003.

| <u>Display/Keyboard</u>               | <u>Comments</u>   |
|---------------------------------------|---|
| P (CR)                                | Select payment entry option.  |
| AD (CR)                               | Add payment data.   |
| 0270007591234567,<br>0002,03,,30 (CR) | Enter account number, client number, and transaction code (nonrecoverable court cost), default to system date and transaction amount. |
| SB (CR)                               | Perform statement balancing function.   |
| OK (CR)                               | Transaction is correct, return to selection screen.   |
| E (CR)                                | Exit LEGAL.   |

#### LA Daily Cycle Menu - Selections L and N

Log onto the master console with an LA user ID.

Using the LD menu, run the selections shown in table 3-15.

Reset the system date to 10/10/78 by performing the following:

TABLE 3-14. LA DAILY CYCLE MENU SELECTIONS

| Selection | Comments   | Output to Match |
|-----------|--|-----------------|
| L         | Sort transactions  | N/A             |
| N         | Nightly batch update. Direct payments are treated as direct payments. Report shows a continuing decrease in the amount delinquent and the balance due; the amount collected has increased. | C-LALD-RPT5     |

| <u>Display/Keyboard</u> | <u>Comments</u>                       |
|-------------------------|---------------------------------------|
| (manual interrupt)      | Reset system date to 10 October 1978. |
| DATE (CR)               |                                       |

Use a terminal other than the master console and perform the following procedures.

Enter LA user ID, select a NEWS option, and log on LEGAL with collector ID 0003.

| <u>Display/Keyboard</u>                      | <u>Comments</u>   |
|--|---|
| P (CR)                                       | Select payment entry option.  |
| AD (CR)                                      | Add transaction.  |
| 0270007591234567,0002,<br>05,123178,75,-(CR) | Enter account number, client number, transaction type (fee/commission), date, amount and negative sign. This transaction is negating the previously entered fee/commission. |
| AD (CR)                                      | Add transaction.  |
| 0270007591234567,,<br>05,123178, 50 (CR)     | Enter corrected fee/commission transaction.   |
| SB (CR)                                      | Perform statement balancing function.   |
| OK (CR)                                      | Transactions are correct, return to selection screen.   |
| E (CR)                                       | Exit LEGAL.   |

#### LA Daily Cycle Menu - Selections L and N

Log on the master console with an LA user ID.

Using the LD menu, run the selections shown in table 3-19.

#### LA On-Demand Report Menu - Selections N, O, and P

Log on the master console with an LA user ID.

Using the LO menu, run the selections shown in table 3-20.

Reset the system date to 01/20/79 by performing the following:

TABLE 3-18. LA DAILY CYCLE MENU SELECTIONS

| Selection | Comments  | Output to Match |
|-----------|---|-----------------|
| F         | Financial update tape labeled LUD500 - FIRST FINANCIAL UPDATE. This selection will simulate transactions coming from the host system. Transactions are stored in accumulative file until the batch update (selection N) is run. | N/A             |
| L         | Sort on-line transactions.  | N/A             |
| N         | Nightly batch update. The on-line transactions will reduce account 0270007591234567 to a zero balance. The transactions from the host cover a six month period.   | C-LALD-RPT9     |

| <u>Display/Keyboard</u>  | <u>Comments</u>  |
|--|--|
| (manual interrupt)   | Reset system date to 20 January 1979.  |
| DATE (CR)  |  |
| 012079 hhmm (CR)   |  |
| Use a terminal other than the master console and perform the following procedures. |  |
| Enter LA user ID, select a NEWS option, and log on LEGAL with collector ID 0003.   |  |
| <u>Display/Keyboard</u>  | <u>Comments</u>  |
| B,CHAMBERS (CR)  | Name search for Chambers.  |
| 1 (CR)   | Select from screen.  |
| SS (CR)  | Enter supervisor screen.   |
| 01,AA01 (CR)   | Reassign this account from client LA01 (original assignment) to client AA01.   |
| DS (CR)  | Return to selection screen.  |
| B,BAL VELT (CR)  | Name search for Balvelt.   |
| 1 (CR)   | Select from screen.  |
| SS (CR)  | Enter supervisor screen.   |
| 01,AA01 (CR)   | Reassign this account to client AA01.  |
| DS (CR)  | Return to selection screen.  |
| A (CR)   | Select automatic option. Becker, Robert E. will appear. Assign this account and all remaining accounts in this queue to client 0002.   |
| SS (CR)  | Enter supervisor screen.   |
| 01,0002 (CR)   | Assign account to client 0002.   |
| NA (CR)  | Next account. Repeat the three previous commands until LEGAL exits automatically after all accounts have been assigned to client 0002. |

TABLE 3-19. LA DAILY CYCLE MENU SELECTIONS

| Selection | Comments  | Output to Match |
|-----------|---|-----------------|
| L         | Sort transactions.  | N/A             |
| N         | Nightly batch update. The fee/commission figures for 123178 were reduced by \$75.00 and then replaced by \$50.00. | C-LALD-RPT10    |

TABLE 3-20. LA ON-DEMAND REPORT MENU SELECTIONS

| Selection | Comments                                 | Output to Match |
|-----------|--|-----------------|
| N         | Complete and direct payment report.      | C-LALO-RPT2     |
| O         | Inventory report by client and customer. | C-LALO-RPT3     |
| P         | Recovery analysis.                       | C-LALO-RPT4     |

### LA Daily Cycle Menu - Selections L, N, and M

Log on the master console with an LA user ID.

Using the LD menu, run the selections shown in table 3-21.

Reset the system date to 08/10/79 by performing the following:

| <u>Display/Keyboard</u> | <u>Comments</u>                      |
|-------------------------|--------------------------------------|
| (manual interrupt)      | Reset system date to 10 August 1979. |
| DATE (CR)               |                                      |
| 081079 hhmm (CR)        |                                      |

### LA Daily Cycle Menu - Selections F, L, and N

Log on the master console with an LA user ID.

Using the LD menu, run the selections shown in table 3-22.

### LA On-Demand Report Menu - Selections N, O, and P

Log on the master console with an LA user ID.

Using the LO menu, run the selections shown in table 3-23.

### INACTIVATE CLIENT

Records may be purged from the LA client file by changing their status; this is done by executing selection S from the LA file maintenance menu.

The status of the system before continuing is as follows:

- The matrix printer is turned off.
- The page key (upper right of keyboard) is set in the down (page mode) position.

TABLE 3-21. LA DAILY CYCLE MENU SELECTIONS

| Selection | Comments  | Output to Match |
|-----------|---|-----------------|
| L         | Sort transactions.  | N/A             |
| N         | Nightly batch update. Nine accounts will show reassignment.                             | C-LALD-RPT11    |
| M         | Daily assignment. All accounts will be assigned to queues based on balance due amounts. | N/A             |

TABLE 3-22. LA DAILY CYCLE MENU SELECTIONS

| Selection | Comments  | Output to Match |
|-----------|---|-----------------|
| F         | Financial update using tape labeled LUD500-SECOND FINANCIAL UPDATE. This tape simulates transactions from the host over a seven month period. | N/A             |
| L         | Sort transactions.  | N/A             |
| N         | Nightly batch update.   | C-LALD-RPT12    |

TABLE 3-23. LA ON-DEMAND REPORT MENU SELECTIONS

| Selection | Comment                                  | Output to Match |  |
|-----------|--|-----------------|--|
| N         | Complete and direct payment report.      | C-LALO-RPT5     |  |
| O         | Inventory report by client and customer. | C-LALO-RPT6     |  |
| P         | Recovery analysis.                       | C-LALO-RPT7     |  |

From the master console, enter the following:

| <u>Display/Keyboard</u> | <u>Comment</u>                         |
|-------------------------|--|
| LM (CR)                 | Display LA file maintenance menu.      |
| S (CR)                  | Enter client file maintenance routine. |
| S,LA01 (CR)             | Search for LA01.                       |
| INACTIVE (CR)           | Inactivate client LA01.                |
| (CR)                    | Return to client selection screen.     |
| E (CR)                  | Exit from client file maintenance.     |

The status of the system before continuing is as follows:

- The matrix printer is turned on.
- The page key (upper right of keyboard) is set in the up position.

Reset the system date to 09/10/80 by performing the following:

| <u>Display/Keyboard</u> | <u>Comment</u>  |
|-------------------------|---|
| (manual interrupt)      | Reset system date to 10 September 1980.                   |
| DATE (CR)               |   |
| 091080 hhmm (CR)        |   |
| + (CR)                  | Log onto LA system with LA user ID at the master console. |
| LA                      |   |
| LH                      | Display LA history menu.                                  |

#### LA History Menu - Selection F

Log on the master console with an LA user ID.

Using the LH menu, run the selection shown in table 3-24.

#### TRANSACTION REPLAY

The objective of this procedure is to demonstrate that transaction replay performs in the L/A subsystem as it does in CCS. Selections from the LA daily cycle and on-demand report menus not previously executed, will be run.

Before proceeding further, the system must be backed up (copied). Refer to the Operator's/Collector's Guide for this procedure. The backup system will be used later for transaction replay.

Autoload the system you have been using with a 09/10/80 date.

Mount all volumes using UTIL mount functions.

Use any terminal other than the master console (if possible) for the LEGAL on-line activities. Log onto LEGAL and select a NEWS option.

TABLE 3-24. LA HISTORY MENU SELECTION

| Selection | Comments   | Output to Match |
|-----------|--|-----------------|
| F         | Client file purge. All client records, which have been inactive for the number of months specified in the LACL parameter (LAUTIFIL), will be purged. A summary report is produced for each client. | C-LALH-RPT1     |

Log in with collector ID 0002 and perform the following:

| <u>Display/Keyboard</u>          | <u>Comments</u>  |
|----------------------------------|--|
| A (CR)                           | Select automatic option, account for Robert E. Becker appears. |
| DC (CR)                          | Bring up change screen.  |
| 01,1111 FIRST STREET<br>(CR)     | Change address line 1.   |
| 03,SAN DIEGO,CA (CR)             | Change city/state.   |
| 04,92117 (CR)                    | Change zip code.   |
| NA (CR)                          | Next account, Richard L. Williams appears.                     |
| A3,R1 (CR)                       | Enter action/result code which requires a comment.             |
| LAWYER HAS BEEN<br>NOTIFIED (CR) | Enter comment.   |
| NA (CR)                          | Next account, John A. Pagano appears.                          |
| A3,R1 (CR)                       | Enter action/result code which requires a comment.             |
| NEW ADDRESS FROM CLIENT<br>(CR)  | Enter comment.   |
| DC (CR)                          | Bring up change screen.  |
| 01,2222 SECOND ST (CR)           | Change address line 1.   |
| 03,LA JOLLA,CA (CR)              | Change address line 3.   |
| 04,92119 (CR)                    | Change zip.  |
| 05,7145718900 (CR)               | Change telephone number.                                       |
| DS (CR)                          | Return to selection screen.                                    |
| E (CR)                           | Exit.  |

From the master console, log on with an LA user ID and save the transaction file, LATRANFL, for later use in transaction replay.

Mount the tape labeled 'TRANFL SAVE' (scratch tape from CCS transaction replay demonstration) on tape unit 0, with write ring.

Run the following under UTIL:

```

READY      LIST (CR)
FN=        LATRANFL (CR)
VL=        (CR)
M=        (CR)
L=        TAPE0 (CR)
F=        U (CR)
  
```

Using the LD menu, run the selections shown in table 3-25.

These reports should be saved to compare to the same reports which are produced after transaction replay.

Using the LD menu, run the selections shown in table 3-26.

Mount backup packs and autoload with 09/10/80.

Log in the system with an LA user ID at the master console.

Mount all volumes using the UTIL mount functions.

Clear the transaction files under UTIL by performing the following:

|       |                |
|-------|----------------|
| READY | CLEAR (CR)     |
| FN=   | LATRANFL (CR)  |
| VL=   | (CR)           |
| READY | CLEAR (CR)     |
| FN=   | LATRNFBCK (CR) |
| VL=   | (CR)           |

Restore the transaction files (from tape labeled TRANFL SAVE) by executing the following:

|       |               |
|-------|---------------|
| READY | LOAD (CR)     |
| FN=   | LATRANFL (CR) |
| VL=   | (CR)          |
| I=    | TAPE0         |
| M=    | (CR)          |

TABLE 3-25. DAILY CYCLE MENU

| Selection | Comments   | Output to Match |
|-----------|--|-----------------|
| L         | Sort transaction file in proper order for collector reports  | N/A             |
| A         | Daily collector activity reports. Collector changes to accounts, time usage, statistics. Carriage return to zero counts. | C-LD-RPT13      |
| C         | Add collector activities to activity file.   | C-LD-RPT14      |

TABLE 3-26. ON-DEMAND REPORT MENU

| Selection         | Comment   | Output to Match |                 |          |                            |              |        |                   |     |         |  |             |     |           |
|-------------------|---|-----------------|-----------------|----------|----------------------------|--------------|--------|-------------------|-----|---------|--|-------------|-----|-----------|
| F                 | Eligible/actual for write-off. | subtotals =       | yes   |                 |                 |          |                            |              |        |                   |     |         |  |             |     |           |
| G                 | Daily assignment report. Use 'ALL'.   | C-LO-RPT9       |                 |          |                            |              |        |                   |     |         |  |             |     |           |
| H                 | Summary account list report.  | C-LO-RPT10      |                 |          |                            |              |        |                   |     |         |  |             |     |           |
| I                 | Weekly collector statistics report; carriage return to zero weekly counts.  | C-LO-RPT11      |                 |          |                            |              |        |                   |     |         |  |             |     |           |
| J                 | Monthly collector statistics report; carriage return to zero monthly counts.  | C-LO-RPT12      |                 |          |                            |              |        |                   |     |         |  |             |     |           |
| M                 | Queue loading report.   | C-LO-RPT13      |                 |          |                            |              |        |                   |     |         |  |             |     |           |

Rewind tape on unit 0.

```
READY      LOAD (CR)
FN=        LATRN BCK (CR)
VL=        (CR)
I=         TAPE0 (CR)
M=        (CR)
READY     EX (CR)
```

Execute transaction replay by entering:

```
REQUEST    = LTRPLY (CR)
```

The system responds:

```
TOTAL ACTIVITIES UPDATED : 2
TOTAL CHANGES UPDATED : 7
TOTAL OTHER RECORD : 0
TOTAL NOT UPDATED : 0
```

#### NOTE

The system has been restored onto the backup disk packs. Since processing will be continued on these packs, they should be relabeled as master packs, and the master packs should be relabeled as backup packs.

Using the LD menu, run the selections shown in table 3-27.

Compare these reports to the reports produced prior to transaction replay.

## CLEAR FILES - READY SYSTEM

The data files used for the installation test kit procedures must be cleared before the system may be parameterized for customer use.

The operator must log onto the master console with a \$\$ user ID.

The operator types in response to system prompt

SC

and presses (CR).

The system configuration menu is displayed as follows:

#### SYSTEM CONFIGURATION MENU

Before making a selection from this menu be sure the auxiliary disk pack(s) have been initialized with the correct volume label or labels for the system which you will select. All disk packs should be mounted and ready.

- A - 12000 ACCOUNT CCS SYSTEM (VOLUME CDD01)
- B - 24000 ACCOUNT CCS SYSTEM (VOLUME CDD01/CDD02)
- C - 36000 ACCOUNT CCS SYSTEM (VOLUME CDD01/CDD02)
- D - 78000 ACCOUNT CCS SYSTEM (VOLUME CDD01)
- E - 12000/9000 ACCOUNT CCS/LA SYSTEM (VOLUME CDD01/CDD03)
- F - 24000/9000 ACCOUNT CCS/LA SYSTEM (VOLUME CDD01/CDD02/CDD03)
- G - 36000/13500 ACCOUNT CCS/LA SYSTEM (VOLUME CDD01/CDD02/CDD03)
- H - 60000/18000 ACCOUNT CCS/LA SYSTEM (VOLUME CDD01)
- I - CLEAR CCS SYSTEM FILES FOR CUSTOMER PARAMETERIZATION

- Z - EXIT

SELECTION =

The operator types

J

and presses (CR).

The following messages will be displayed:

TABLE 3-27. DAILY CYCLE MENU

| Selection | Comments   | Output to Match |
|-----------|--|-----------------|
| L         | Sort the transaction file in proper order for the collector reports. | N/A             |
| A         | Daily collector activity reports; carriage return to zero counts.    | C-LD-RPT16      |
| C         | Add collector activities to the activity file.                       | C-LD-RPT17      |

OPERATOR - A JOB WILL BE BATCHED IN THIS PROCEDURE TO PURGE THE PROGRAM LIBRARY. THE BATCH HOST MUST BE ACTIVE BEFORE PROCEEDING. TO ACTIVATE THE BATCH HOST, PERFORM

MI, \*BATCH,F

RESPOND: 'N' CARRIAGE RETURN - IF BATCH HOST IS NOT ACTIVE

CARRIAGE RETURN ONLY - TO CONTINUE

READY?>

THE DATA FILES WILL BE CLEARED.

THE FILES WILL BE INITIALIZED FOR START OF PARAMETERIZATION.  
END QTIL.

OPERATOR - WHEN THIS SELECTION IS COMPLETE, USE THE UTILITY COMMAND 'BATS' TO CHECK THE PROGRESS OF THE JOB NUMBERED LISTED BELOW. WHEN THE STATUS IS NO LONGER 'BEING SENT', USE THE UTILITY COMMAND 'PRINT' TO PRINT THE JOB. VERIFY THE JOB COMPLETED WITHOUT ERROR.

JOB NO. = J001  
END UTIL

CCS SYSTEM FILES ARE READY FOR PARAMETERIZATION.

# HARDWARE REQUIREMENTS

A

## 1. Minimum Required Hardware

|                 |  |
|-----------------|--|
| 1 - CYBER 18-25 | - See Note 1 Description                 |
| 4 - 1882-32     | 64KB Memory Modules                      |
| 1 - 1882-16     | 32KB Memory Module                       |
| 1 - 1867-4      | Disk Subsystem                           |
| 1 - 1867-20     | Disk Drive                               |
| * - 2561-1      | CLA Controllers                          |
| * - 752-30      | Terminal Display                         |
| * - 752-202     | Terminal Keyboard                        |
| 1 - 755-21      | Matrix Printer                           |
| 1 - 1860-X      | Mag Tape Subsystem (1 Mag Tape) - Note 1 |
| 1 - 1827-32     | 300 LPM Printer                          |
| 1 - 1828-1      | CR/LPR Controller                        |
| 1 - 1811-2      | Console Display                          |

Note \* = Number determined by user requirements

Note 1 = 7 track mag tape subsystems are not supported under CCS 2.

## 2. Maximum Required Hardware

|                 |  |
|-----------------|--|
| 1 - CYBER 18-25 | - See Note 1 Description                                     |
| 8 - 1822-32     | 64 KB Memory Modules   |
| 1 - 1867-4      | Disk Subsystem (50 MB)                                       |
| 3 - 1867-20     | Disk Drives (50 MB)  |
| 16 - 2561-1     | CLA Controllers  |
| 32 - 752-30     | Terminal Displays  |
| 32 - 752-202    | Terminal Keyboards   |
| 1 - 755-21      | Matrix Printer   |
| * - 1860-X      | Mag Tape Subsystems (Max. = 4 M.T. units) - See Note 1 above |
| 1 - 1827-32     | 300 LPM Printer  |
| 1 - 1828-1      | CR/LPR Controller  |
| 1 - 1811-2      | Console Display  |

Note \* = Reference CYBER 18 Hardware configurator for definition of expanded Mag Tape configurations.

## 3. Optional Hardware

- 1827-60 600 LPM Printer
- 1829-30/60 300/600 Card Reader

## 4. Configuration Selection

### Disks Required

Mass memory configurations are determined by account value. Table A-1 shows the account volumes supported by CCS/LA and the required hardware. The minimum hardware requirements with support 'A'. The maximum hardware requirements will support all selections.

TABLE A-1. ACCOUNT VALUES SUPPORTED BY CCS/LA

| Mass Memory Configuration | Number of CCS Accounts | Number of L/A Accounts | Hardware Required  |
|---------------------------|------------------------|------------------------|--|
| A                         | 12,000                 | 0                      | 1 1867-2, -4 Disk Subsystem†<br>1 1867-20 Disk Drive     |
| E                         | 12,000                 | 9,000                  | 1 1867-2, -4 Disk Subsystem†<br>2 1867-20 Disk Drives    |
| B                         | 24,000                 | 0                      | 1 1867-2 Disk Subsystem††<br>2 1867-20 Disk Drives       |
| F                         | 24,000                 | 9,000                  | 1 1867-2 Disk Subsystem††<br>3 1867-20 Disk Drives       |
| C                         | 36,000                 | 0                      | 1 1867-4 Disk Subsystem<br>2 1867-20 Disk Drives         |
| G                         | 36,000                 | 13,500                 | 1 1867-4 Disk Subsystems<br>3 1867-20 Disk Drives        |
| D                         | 78,000                 | 0                      | 2 1867-40 Disk Drives<br>1 1887-5/1833-6 Disk Controller |
| H                         | 60,000                 | 18,000                 | 2 1867-40 Disk Drives<br>1 1887-5/1833-6 Disk Controller |

†Applies for both 1867-2 and 1867-4 products.

††The 1867-2 Disk Subsystem is no longer in production. It applies to the existing installed base only.
