Over 100 New Features

- Word-processor-like text handling with tabs and hanging indents for easy annotation and quick bullet charts.
- Revolutionary new file interchange allows direct import of PICT, PICT2, TIFF, EPSF, MacPaint, MacDraw, MacDraw II and other text and graphic files.
- Directly export Encapsulated PostScript (EPSF) files for precision transfer of graphics to desktop publishing systems.
- Directly export Encapsulated PostScript (EPSF) files for precision transfer of graphics to desktop publishing systems.
- PANTONE™* MATCHING SYSTEM palettes allow you to directly select industry-standard colours.
- Precision Bezigon and polygon tools empower you to create curved objects more easily than ever before.
- Full-Screen slide shows and enhanced Slide Manager provide greater flexibility in creating and delivering presentations.

* Pantone, Inc.'s check-standard trademark for colour reproduction and colour reproduction materials.

When you need to create professional-looking graphics fast, choose MacDraw Pro—the software that lets you visually showcase your most elaborate ideas.   With MacDraw Pro, you can illustrate reports, design products, publish flyers and present proposals with flair. MacDraw Pro combines powerful illustration tools with an innovative, easy-to-use interface, so you can design, publish and present top-quality work—whether you're new to the Macintosh or a seasoned pro.

MacDraw Pro provides an outstanding new vehicle for developing powerful, flexible graphics.

Built around the legendary MacDraw user interface, MacDraw Pro offers professionals a streamlined set of tools for fast, accessible creative power. Use this remarkable software for a variety of graphics tasks from developing presentations with graphic accents, to creating charts, layouts, illustrations, floor plans — and much more.

A wide array of new and improved tools allow you to quickly generate sophisticated graphics. Create drawings in black and white or colour — MacDraw Pro lets you use the full colour capabilities of your Macintosh. Produce illustrations with precise shapes and smooth curves, then add highlights or add depth by choosing from a comprehensive palette of customisable gradient fills.

Powerful text-handling capabilities like tabs or line and letter spacing control, combined with Claris XTND architecture, give you increased flexibility and control when integrating text and graphics. Incorporate scanned images, text or graphics from other software programmes directly into your drawings, then use MacDraw Pro's powerful tools to edit and refine them to better suit your needs.
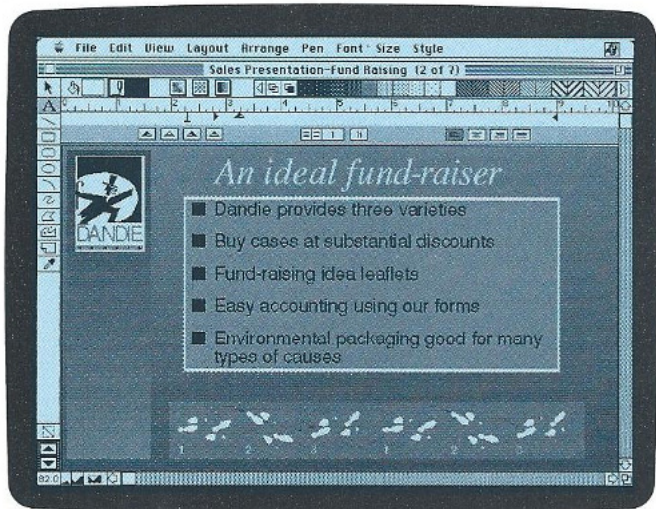

MacDraw Pro. The one graphic solution no Macintosh owner should be without.

Claris is a worldwide market leader in Macintosh software development. Claris products have set the standards for word processing, drawing, project planning, database management, and more. With MacDraw II, MacWrite™ II, MacPaint™, MacProject™ II, FileMaker™ Pro, Claris CAD, and SmartForm™ Series software, you can expect the familiar Claris power, ease of learning, and ease of use—and the high-quality documentation, training, service and support you deserve.

MacDraw Pro

MacDraw Pro lets you quickly add text using the familiar ruler controls of a word processor—with a full complement of tabs, hanging indents, and line spacing control — allowing you to add quick bullet charts to presentations.

Three types of colour or grey-scale gradients allow you to add highlights to your documents for a feeling of depth. Each gradient can be edited, named, and stored in an easy to access palette.

Features Benefits

Lets You Get To Work Fast

Feature	Benefit
Streamlined Tool Set	Start designing graphics quickly with tools that create lines, rectangles, ovals, arcs, polygons, Bezigons, and more. Each tool works similarly, so you can learn fast.
Comprehensive Online Help	Look up information and procedures for dialog boxes, selected tools and more.
Tutorial Guide	Learn new skills at your own pace, even if you've never used a drawing programme before.
Stationery Templates	Pre-format any setting for your documents. You can even set up MacDraw Pro to start with your customised configuration.
Claris XTND Architecture	Open and save documents in a variety of industry-standard file formats including PICT, Colour PICT2, TIFF (import), and EPSF. Provides access to most clip-art libraries.

Colour, Pattern and Gradient Fills

| Feature	Benefit
Extensive Colour Support	Communicate more effectively whether your Macintosh has 16, 256, thousands or millions of colours available. An essentially unlimited number of colours per palette provides you with the creative flexibility you need.
PANTONE™* MATCHING SYSTEM	Select industry-standard colours for easier production processes.
Editable Gradient Fills	Create professional shading effects to add highlights and simulate depth. Each of the three gradient types allows up to four colours for added impact.
Full-featured Floating Palettes	Click and drag to visually organise palettes for easy selection of colours, patterns and gradient fills—or view palettes by name to select fills with precision. Open and save palettes to share among documents and workgroups.
Automatic Colour Approximation	Extend the uses of your system by displaying over 2,000 colours on a 256-colour video card, or over 100 on a 16-colour video card. Open colour documents on a monochrome system with colours shown as shades of grey.

* Pantone, Inc.'s check-standard trademark for colour reproduction and colour reproduction materials.

MacDraw Pro

Full-featured Fill Palettes.
Tear-off palettes allow access to a variety of innovative and time-saving features. View palettes by name for precise selection. Save and open palette files to share fills with other documents or with a workgroup.

Flexible Style Bar.
Add your favourite colours, gradients, or patterns to the style bar for instant access. Save stationery files with commonly used fills for fast start-up.

Powerful Gradient Fills.
MacDraw Pro software offers three types of gradient fills to quickly add highlights to your graphics. And MacDraw Pro can take full advantages of all of the colours your Macintosh can provide—from black & white to millions of colours.

New Precision Zoom Tool.
New Precision Zoom tool allows you to draw a rectangle around the area you'd like to have fill the screen. And with the ability to zoom in or out in one percent increments, you'll maximise the use of available screen space.

Claris Software Solutions.
Use MacDraw Pro with these other Claris products, for complete, seamless software integration:
- FileMaker Pro—for database publishing with graphics
- MacWrite II—import MacWrite II text directly and export graphics to print from MacWrite II.
- MacPaint 2.0—directly import MacPaint 2.0 files for artistic effects.
- MacProject II—Customise MacProject II graphics for greater presentation flexibility.

Required Equipment
- Macintosh Plus, SE, Classic, Portable 1 MB (2 MB recommended)
- SE/30, II Family, LC 2 MB (4MB for millions of colours)
- Hard drive required
- System software 6.05 or later
- 32-bit QuickDraw required for colour (included)

Printer Support
- Apple LaserWriter, LaserWriter Plus, LaserWriter II NT, NTX or SC
- Apple ImageWriter, II, LQ
- Tektronix 4693 DX, Phaser, QuickColour
- Hewlett-Packard PaintJet, PaintWriter, DeskWriter
- Seiko ColourPoint
- QMS ColourScript
- Mirus FilmPrinter
- Presentation Technologies Montage
- Plotter Driver available separately
