Jim, Eric, Dan, Frank -

Here are the new set of board/drHw IDs assigned by Apple for new products. I gave them non-descriptive names to shield what we were working on:

8Li - (RasterOps A/8)

The board ID is \$05C5.

The functional sResource types are:

CatDisplay	EQU	\$0003
TypVideo	EQU	\$0001
DrSwApple	EQU	\$0001
DrHwRasterOpsA/8	EQU	\$041D

Mercury24 (RasterOps A/24)

The board ID is \$05C4.

The functional sResource types are:

CatDisplay	EQU	\$0003
TypVideo	EQU	\$0001
DrSwApple	EQU	\$0001
DrHwRasterOpsA/24	EQU	\$041C

I also had three sets defined for the DuoMates:

Ren (RasterOps Duo 1):

The board ID is \$05C1.

The functional sResource types are:

CatDisplay	EQU	\$0003
TypVideo	EQU	\$0001
DrSwApple	EQU	\$0001
DrHwRasterOpsDuo1	EQU	\$0419

CatDock	EQU	\$0020
TypStation	EQU	\$0001
DrSwRasterOps	EQU	\$0101
DrHwRasterOpsDuo	EQU	\$0100

Stimpy (RasterOps Duo 2):

The board ID is \$05C2.

The functional sResource types are:

CatDisplay	EQU	\$0003
TypVideo	EQU	\$0001
DrSwApple	EQU	\$0001
DrHwRasterOpsDuo2	EQU	\$041A

CatDock	EQU	\$0020
TypStation	EQU	\$0001
DrSwRasterOps	EQU	\$0101
DrHwRasterOpsDuo	EQU	\$0100

Daffy (RasterOps Duo 3):

The board ID is \$05C3.

The functional sResource types are:

CatDisplay EQU \$0003
TypVideo EQU \$0001
DrSwApple EQU \$0001
DrHwRasterOpsDuo3 EQU \$041B

CatDock EQU \$0020
TypStation EQU \$0001
DrSwRasterOps EQU \$0101
DrHwRasterOpsDuo EQU \$0100

I may combine Ren and Stimpy into the same drHwID...

Please stop by if you have questions,

David Fung, x388
